

Forest Practices Board Manual

Board Manual

Section 1	
Method For Determination of Adequate Shade Requirements on Streams	M1
Section 2	
Channel Migration Zones and Bankfull Channel Features	M2
Section 3	
Guidelines for Forest Roads	M3
Section 4	
Guidelines for Clearing Slash and Debris from Type Np and Ns Water	M4
Section 5	
Guidelines for Forest Practices Hydraulic Projects	M5
Section 6	
Guidelines for Determining Acceptable Stocking Levels	M6
Section 7	
Guidelines for Riparian Management Zones (RMZ) (Measuring Widths and Tree Counts)	M7
Section 8	
Guidelines for Wetland Delineation	M8
Section 9	
Guidelines for Wetland Replacement by Substitution or Enhancement	M9
Section 10	
Non-Native Wetland Plant Species	M10
Section 11	
Standard Methodology for Conducting Watershed Analysis	M11
Section 12	
Guidance for Application of Forest Chemicals	M12
Section 13	
Guidelines for Determining Fish Use for the Purpose of Typing Waters	M13
Section 14	
Survey Protocol for Marbled Murrelets	M14
Section 15	
Guidelines for Estimating the Number of Marbled Murrelet Nesting Platforms	M15
Section 16	
Guidelines for Evaluating Potentially Unstable Slopes and Landforms	M16
Section 17	
Guidelines for the Small Forest Landowner Forestry Riparian Easement Program	M17
Section 18	
Guidelines for Rivers and Habitat Open Space Program	M18
Section 19	
Guidelines for Hardwood Conversion	M19
Section 20	
Guidelines for Financial Assurances	M20
Section 21	
Guidelines for Alternate Plans	M21
Section 22	
Guidelines for Adaptive Management Program	M22
Section 23	
Guidelines for Field Protocol to Locate Mapped Division Between Stream Types and Perennial Stream Identification	M23
Section 24	
Guidelines for the Interim Modification of Bull Trout Habitat Overlay	M24
Section 25	
Guidelines for Bull Trout Presence Survey Protocol	M25
Section 26	
Guidelines for Large Woody Debris Placement Strategies	M26
