

What is your vision for wildland fire management in Washington?

Please respond to the question above. Your responses can be as simple as a list of words you feel are important or as complete as a full sentence.

In 10 years...

What is your vision for wildland fire management in Washington?

Working in pairs, please respond to the question above. Your responses can be as simple as a list of words you feel are important or as complete as a full sentence.

In 10 years...

What is your vision for wildland fire management in Washington?

Working as a table group, discuss the words and themes you developed individually and in pairs. Have one person from your table transfer the words and themes that emerged onto this sheet of paper. Within your table group, work to find consensus where you can. Are there key themes that you all feel strongly about and can agree upon? At the end of this activity, hand your paper over to the project team.

In 10 years...

Step 1: On your own. Work on one goal at a time. Answer the following questions.

What does the goal mean to you?

What do the underlined words mean to you? How should we measure the underlined words in Washington state?

Step 2: With your group. When your table is ready to discuss, share your ideas for each goal. Use sticky notes to put ideas on the big sheet at your table. Group like ideas together. Add or remove sticky notes as necessary!

Step 3: With your group. For each of the three goals, decide which 1-2 ideas your group wants to share with everyone. Rewrite those sticky notes and put them up on the corresponding piece of paper on the wall for all to see.

Step 1: Brainstorm!

Your topic: _____

For this topic, your group will brainstorm several strategies that you believe would advance the chosen table topic. Don't worry about being specific, you will have the opportunity to refine these strategies as a table in the next step.

The following questions may help you brainstorm some possible approaches.

- What are desired outcomes in 5-10 years?
- What changes, if made, would enable success and move the ball forward?
- What strategies and solutions should be included in the strategic plan?

Working as a group, come up with ideas and put them on sticky notes and/or on the flip chart at your table. Feel free to use the space below if you wish to take notes.

Step 2: Pick 2 or 3 Strategies to Explore in Detail

Working as a table group, select a few (two or three) strategies to explore in detail. Work through the following questions for each strategy and as a group record your answers in the pre-printed flipchart provided at your table. Be as brief or as detailed as your group wishes to be – a few words or a few sentences all work.

1. Who is **responsible** for implementing this strategy? What agencies or partners are needed?
2. How can existing **resources** move this strategy forward? Are additional resources needed?
3. What **policy changes** are needed, if any?
4. How **urgent** is this strategy? (check one) 1-2 years | 3-5 years | 6-10 years | 10+ years
5. How does the strategy **account for a future** with larger, hotter, more frequent wildfires?
6. How should communities be **engaged** in implementation? How can the strategy best serve LEP and vulnerable communities?
7. What improvement in **communication and coordination** is needed? Which entities?
8. Are there other **major factors** to consider when implementing this strategy (e.g., implementation would make training season longer, require more office space)?
