

Appendix H. Natural Regeneration Plan Western Washington

The landowner is responsible for meeting Forest Practices reforestation requirements per [WAC 222-34-010](#).

1. **Harvest is scheduled to occur:** _____
Month/Year

2. **Select one of the following options:**

The landowner proposes an alternate plan ([WAC 222-34-010\(6\)](#)) for natural reforestation. The alternate plan must be submitted with your FPA/N.

OR

The landowner agrees to follow all the requirements listed below ([WAC 222-34-010\(5\)](#))

- There is a seed source available that is capable of producing well-formed trees of a commercial tree species.
- The landowner agrees not to harvest this seed source until _____, or until issuance of a satisfactory reforestation inspection report.
- The seed source is:
 - Shown on an attached map
 - Marked on the ground
 - At least an average of eight (8) seed trees per acre
 - Within 400 feet of areas requirement reforestation
- Competing vegetation shall be controlled to the extent necessary to allow establishment, survival, and growth by commercial species. The regeneration will be protected from competing vegetation and allowed to establish, grow, and survive.
