

## **Section 11 Standard Methodology for Conducting Watershed Analysis**

The *Standard Methodology for Conducting Watershed Analysis*, also known as the Watershed Analysis Manual, is a technical publication required by chapter 222-22 WAC. It is used by qualified scientists and experts to determine, at the watershed administrative unit (WAU) scale, conditions of selected public resources and cultural resources. Forest managers then develop site-specific prescriptions that further regulate forest practices to protect public resources and voluntary management strategies to protect cultural resources. The latest version of the Watershed Analysis Manual is available at <http://www.dnr.wa.gov/watershed-analysis>.

Questions regarding the manual should be directed to:

Department of Natural Resources  
Forest Practices Division  
1111 Washington St. SE
