Directory of Washington Mines, 2001

Compiled by Donald T. McKay, Jr., David K. Norman, Mary Ann Shawver, and Ronald F. Teissere
Washington Division of Geology and Earth Resources
PO Box 47007; Olympia, WA 98504-7007

The following is a directory of mines with current Reclamation Permits from the Department of Natural Resources (DNR) as required by RCW 78.44. The DNR administers the Surface Mine Reclamation Act, a reclamation law that requires a permit for each mine that: (1) results in more than 3 acres of disturbed ground, or (2) has a highwall that is both higher than 30 feet and steeper than 45 degrees (Chapter 78.44 Revised Code of Washington [RCW], Chapter 332-18 Washington Administrative Code [WAC]).

The Mine Reclamation Act was amended in 1993 to assure that every mine exceeding the thresholds defined in RCW 78.44 is thoroughly reclaimed. DNR is responsible for ensuring that reclamation follows completion of mining. Mine operations, exclusive of reclamation, may be regulated by local governments, state, and (or) federal agencies.

Mines or excavations excluded from RCW 78.44 and therefore not requiring DNR Reclamation Permits include coal mines and those used primarily for on-site construction,

on-site road maintenance, or on-site landfill construction. Additionally, mines on forest or farm lands, when used for road construction, on-site maintenance, or when on contiguous parcels, do not require Reclamation Permits. For more information on mining regulations in Washington State, see Norman (2000).

Downloadable ArcInfo and ArcView files with the locations of 1162 current and 1645 past permitted sites are available on the Washington Division of Geology and Earth Resources website at <http://www.wa.gov/dnr/htdocs/ger/smgis.htm>. As of the date of publication only the attributed points are available; the files contain no other features such as rivers, highways, county boundaries, etc.
