

Teanaway Community Forest Strategic Management Plan

Structural Building Blocks:

Five mandates (provided by state legislature – 2SSB 5367)

- **Protect and enhance the water supply and protect the watershed;**
- **Maintain working lands for forestry and grazing while protecting key watershed functions and aquatic habitat;**
- **Maintain and where possible expand recreational opportunities consistent with watershed protection, for activities such as hiking, fishing, hunting, camping, birding and snowmobiling;**
- **Conserve and restore vital habitat for fish, including steelhead, spring chinook, and bull trout, and wildlife, including deer, elk, large predators, and spotted owls; and**
- **Support a strong community partnership in which the Yakama Nation, residents, business owners, local governments, conservation groups and others provide advice about ongoing land management.**

The Advisory Committee will work together to:

- Further define each legislative mandate or “goal”
- Identify objectives (**Community desires and needs**) for the uses associated with each mandate/goal (eg., Objectives describe what you want to achieve in the future)

The Agencies and the Advisory Committee will work together to:

- Identify strategies for accomplishing each objective (strategies describe methods for achieving each objective)
