Certification Opportunities for DNR Timber Purchasers

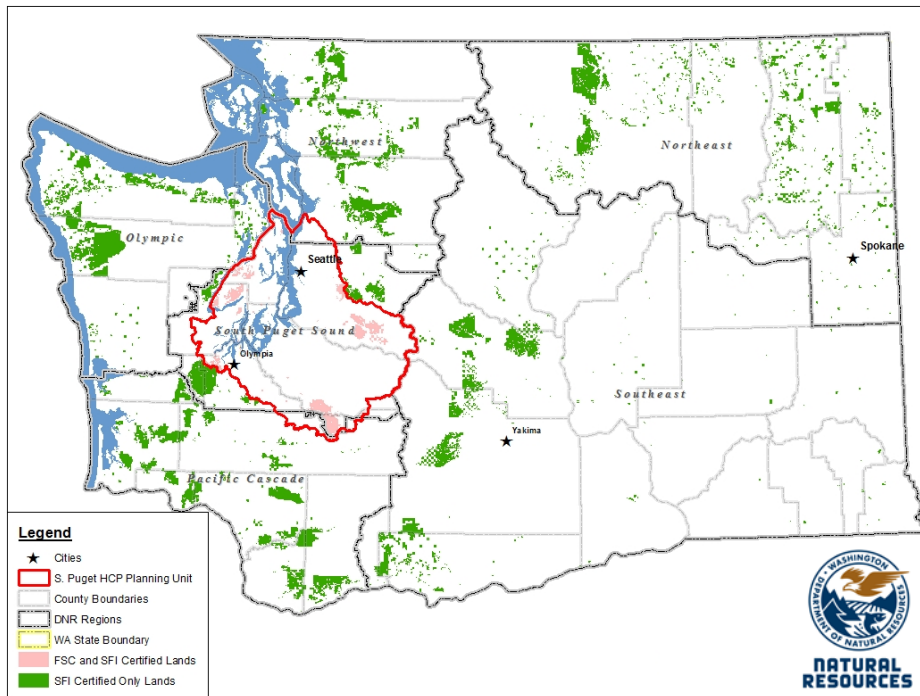

Certified forests are grown to an approved set of standards which demonstrate environmentally responsible, socially beneficial, and economically viable management practices that promote responsible forestry. This unique commitment to responsible forestry recognizes that forest landowners play a critical role in ensuring the long-term health and sustainability of our forests.

Forest Stewardship Council® (FSC®) is an independent, non-profit organization that promotes responsible management of the world's working forests through the development of forest management standards, a voluntary certification system, and trademarks that provide recognition and value to products bearing the FSC label in the marketplace. FSC standards ensure forestry is practiced in an environmentally responsible, socially beneficial, and economically viable way.

Sustainable Forestry Initiative Inc. is an independent, non-profit organization internationally endorsed and accepted around the world. The Sustainable Forestry Initiative® (SFI) program is based on the premise that responsible environmental behavior and sound business decisions can coexist. Its three-chamber Board of Directors governs all aspects of the SFI® program, with equal representation from the environmental, economic, and social sectors.

Currently, all Department of Natural Resources (DNR)-managed forestlands and conservation areas in Washington State are certified under the SFI program Standard. Forestlands within DNR's South Puget Habitat Conservation Plan Planning Unit, located within parts of King, Pierce, Thurston, Lewis, Kitsap, and Mason counties, are dually certified under both the FSC-US Forest Management Standard and the SFI program Standard.

Certification under each standard involves an inspection audit of the landowner's forest management activities by an independent, accredited third-party to verify that it meets specified forest management principles. If the forest unit complies with the specific standard, the landowner receives a certificate of conformance ensuring that responsible forestry is being practiced. Both standards encourage integration of perpetual growing and harvesting of trees with strong measures to protect wildlife, plants, soil, water, and air quality. Both standards provide a seal of approval that forests certified under these principles are well-managed. The global marketplace recognizes and endorses multiple forest certification standards. Each standard has individual market niches. By being dually certified, DNR can maximize its customer base and provide choices to the consumer.

DNR's FSC certificate number is: BV-FM/COC-080501

DNR's SFI certificate number is: PwC-SFIFM-513

DNR-managed forestlands within the South Puget Habitat Conservation Plan Planning Unit (located within parts of King, Pierce, Thurston, Lewis, Kitsap, and Mason counties) are certified as being in compliance with the Forest Stewardship US Forest Management Standard.

Bidder's/Purchaser's Inspection of Sale Area and Forest Products

Acreage estimates and volume estimates contained within each timber notice of sale and each timber sale contract are made only for administrative and identification purposes. Except as expressly provided by the timber sale contract, the purchaser shall be responsible for paying the entire purchase price, even if the actual acreage or timber volume varies from the estimated quantity or volume shown.

All prospective bidders have the opportunity and are expected to inspect the sale area and the forest products located thereon. Bidders shall not rely on any representations by the State including, but not limited to, acreage estimates, volume estimates, appraisal or pre-bid documentation. The successful bidder/purchaser will further warrant that they have entered the timber sale contract without any reliance upon the DNR's volume estimates, acreage estimates, appraisals, pre-bid documentation, or any other representation by the DNR.

Any timber sale contract arising out of these public auctions will require the successful purchaser to warrant that they are entering the timber sale contract based solely upon their own judgment of the value of the forest products, formed after their own examination and inspection of both the timber sale area and the forest products being sold.

Exclusion and Disclaimer of Warranties

The PARTIES AGREE that the IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, and ALL OTHER WARRANTIES EXPRESS OR IMPLIED, ARE EXCLUDED from this transaction, and shall not apply to the goods sold. For example, THE FOLLOWING SPECIFIC MATTERS ARE NOT WARRANTED, and are EXCLUDED from this transaction:

- B. ***The condition of the forest products.*** All forest products will be conveyed "AS IS."
- C. ***The acreage contained within any sale area.*** Any acreage descriptions appearing in the timber notices of sale, timber sale contract, timber sale map or other documents are estimates only, provided solely for administrative and identification purposes.
- D. ***The volume, quality, or grade of the forest products.*** The descriptions of the forest products to be conveyed are estimates only, made solely for administrative and identification purposes.
- E. ***The correctness of any soil or surface conditions, presale construction appraisals, investigations, and all other pre-bid documents prepared by or for the State.*** These documents have been prepared for the State's appraisal purposes only.
- F. ***That the sale area is free from threatened or endangered species, or their habitat.*** The State is not responsible for any interferences with forestry operations that result from the presence of any threatened or endangered species, or the presence of their habitat, within the sale area.
- G. That the forestry operations to be performed under this contract will be free from regulatory actions by governmental agencies. The State is not responsible for actions to enforce regulatory laws, such as the Washington Forest Practices Act (Chapter 76.09 RCW), taken by the Department of Natural Resources or any other agency that may affect the operability of these timber sales.
- H. Items contained in any other documents prepared for or by the State.

BIDDING PROCEDURES FOR TIMBER AUCTIONS

The general requirements that follow are a part of all Timber Notices of Sale to be auctioned by the Department of Natural Resources (DNR).

General Information

The State reserves the right to waive minor irregularities and the right to reject any or all bids.

- A. This book contains the timber notices of sale and maps for each timber sale scheduled to be auctioned. More specific information can be obtained by contacting the appropriate region office at the number listed on the back cover of this book. Sales may be added to each monthly auction by the Department which are not included in this publication. This publication is not updated following original production.
- B. The timber notice of sale is a summary of sale information. For more specific information, interested parties are encouraged to view the Auction Packets on www.dnr.wa.gov. Auction Packets contain **DRAFT** copies of the timber notice of sale, map, contract, road plan, cruise data, precruise and cruise narrative, and other associated documents.
- C. Timber sale auction packets may also be obtained at no charge for individual sales by visiting the appropriate region office.
- D. Timber sale contracts contain extensive terms and conditions that will be binding upon successful high bidders. Each bidder should carefully review all terms contained in the appropriate **DRAFT** timber sale contract prior to bidding on a sale, and should review the final contract prior to signing. **DRAFT** timber sale contracts are contained in the auction packets and are available upon request at the respective region office.
- E. Sales advertised in this book are subject to the Board of Natural Resources approval before they will be sold. The Board meets and approves sales approximately six weeks prior to auction.
- F. The State does not guarantee the accuracy of any information contained herein pertaining to particular sales. Therefore, all prospective purchasers are expected to make their own independent inspections and appraisals prior to bidding.
- G. If any conflict exists between the information in the Timber Notice of Sale, timber sale map, sale auction packets and that in the timber sale contract, the signed contract will prevail.
- H. Purchasers must pay the Forest Excise Tax on the bid price, permanent road construction costs, and other considerations. The tax rate is 5% without the EARR credit and 4.2% with the credit. For more information contact the Department of Revenue, Forest Tax Section at 1-800-548-8829.
- I. **All sales are subject to confirmation by the DNR under RCW 79.15.120.**
- J. **Within 30 days of sale confirmation, the apparent high bidder will provide to the State the Performance Security specified on each Notice of Sale. The successful bidder also agrees to return a signed contract to the State within 30 days of confirmation.** Failure to provide a signed contract to the state within 30 days of confirmation may result in a loss of bidder's rights to the products sold and forfeiture of initial deposit moneys.
- K. Each DNR region office has information about sales offered in that region. For further information, contact the respective DNR region office. Region office addresses and telephone numbers appear on the back cover of this booklet.
- L. The purchaser assumes the responsibility for any costs associated with extra maintenance or repair levied by a county for any county road used by the purchaser.

Auction Time and Location

Auctions will start at 10:00 a.m. and close at 4:00 p.m. on the date and at the location specified in each Timber Notice of Sale.

Bidding Process

- A. All timber will be auctioned using the sealed bid method.
- B. Bids submitted on the day of auction must be in the bid box at the specified auction location before 10:00 a.m. The respective DNR region office must receive mailed bids by 4:30 p.m., on the last business day before the auction. Bidders assume all risk for the method of delivery.
- C. The DNR has the right to reject bid forms that are completed incorrectly. *All bid forms must have an original signature on behalf of the person or entity submitting the bid, and must be on the form provided in this booklet or a photocopy thereof. Revised documents are not permissible.* Bidding instructions are on the back of the Sealed Bid Form. A bid deposit must be included in the sealed bid envelope unless using a Timber Sale Statewide Bid Bond.
- D. All bids must include the completed Sealed Bid Form and bid deposit.
- E. Bids will be opened in each respective region in the order in which sales appear in the Public Auction Sale of Timber book (alphabetically by county and by agreement number). Sales added after the book is printed will be inserted to retain this order. Sort sales may be auctioned out of this sequence at the State's convenience.
- F. If a tie bid occurs, the names of the tie bidders will be placed in a hat and the successful bidder will be determined by a drawing.
- G. Opportunities to Withdraw Bids:
For all sales offered on a stumpage basis only, the apparent high bidder on a particular sale will have the option of withdrawing additional sealed bids submitted for any remaining sales to be auctioned. Schedule B
Thinning Prescription

Proposed thinning is a spacing based thinning, targeting species for removal in the suppressed, intermediate and co-dominate crown classes.

Desired Conditions: Residual stand will be evenly distributed dominated by Douglas-fir, western redcedar, and larger diameter classes of western hemlock.

- Purchaser shall leave sufficient trees to achieve the following evenly distributed across the thinning area:
 - o Average spacing of 26 x 26 feet
 - o To accomplish this prescription, fallers shall harvest the following trees in the following order:
 1. Cut all Hardwoods
 2. Cut all Pacific silver fir
 3. Cut western hemlock starting at the smallest diameter classes until stocking targets are met, with an upper limit of 22 inches dbh.
- Trees marked with blue special management tags that meet prescription may be cut.

The residual stand characteristics shall consist of:
Approximately 215-200 square feet of basal area per acre
No less than 65 trees per acre.

If the prescription will result in the desired residual conditions stand characteristics not being met, the Purchaser and Contract Administrator shall jointly develop a plan to achieve desired conditions to minimize any impact to hydrology in the thinning area.

Where the prescription would leave an opening greater than 50 feet in diameter, the Purchaser shall leave a conifer take tree from the largest diameter, largest crown class, best form, and undamaged, unless permission to do otherwise is granted in writing by the Contract Administrator.

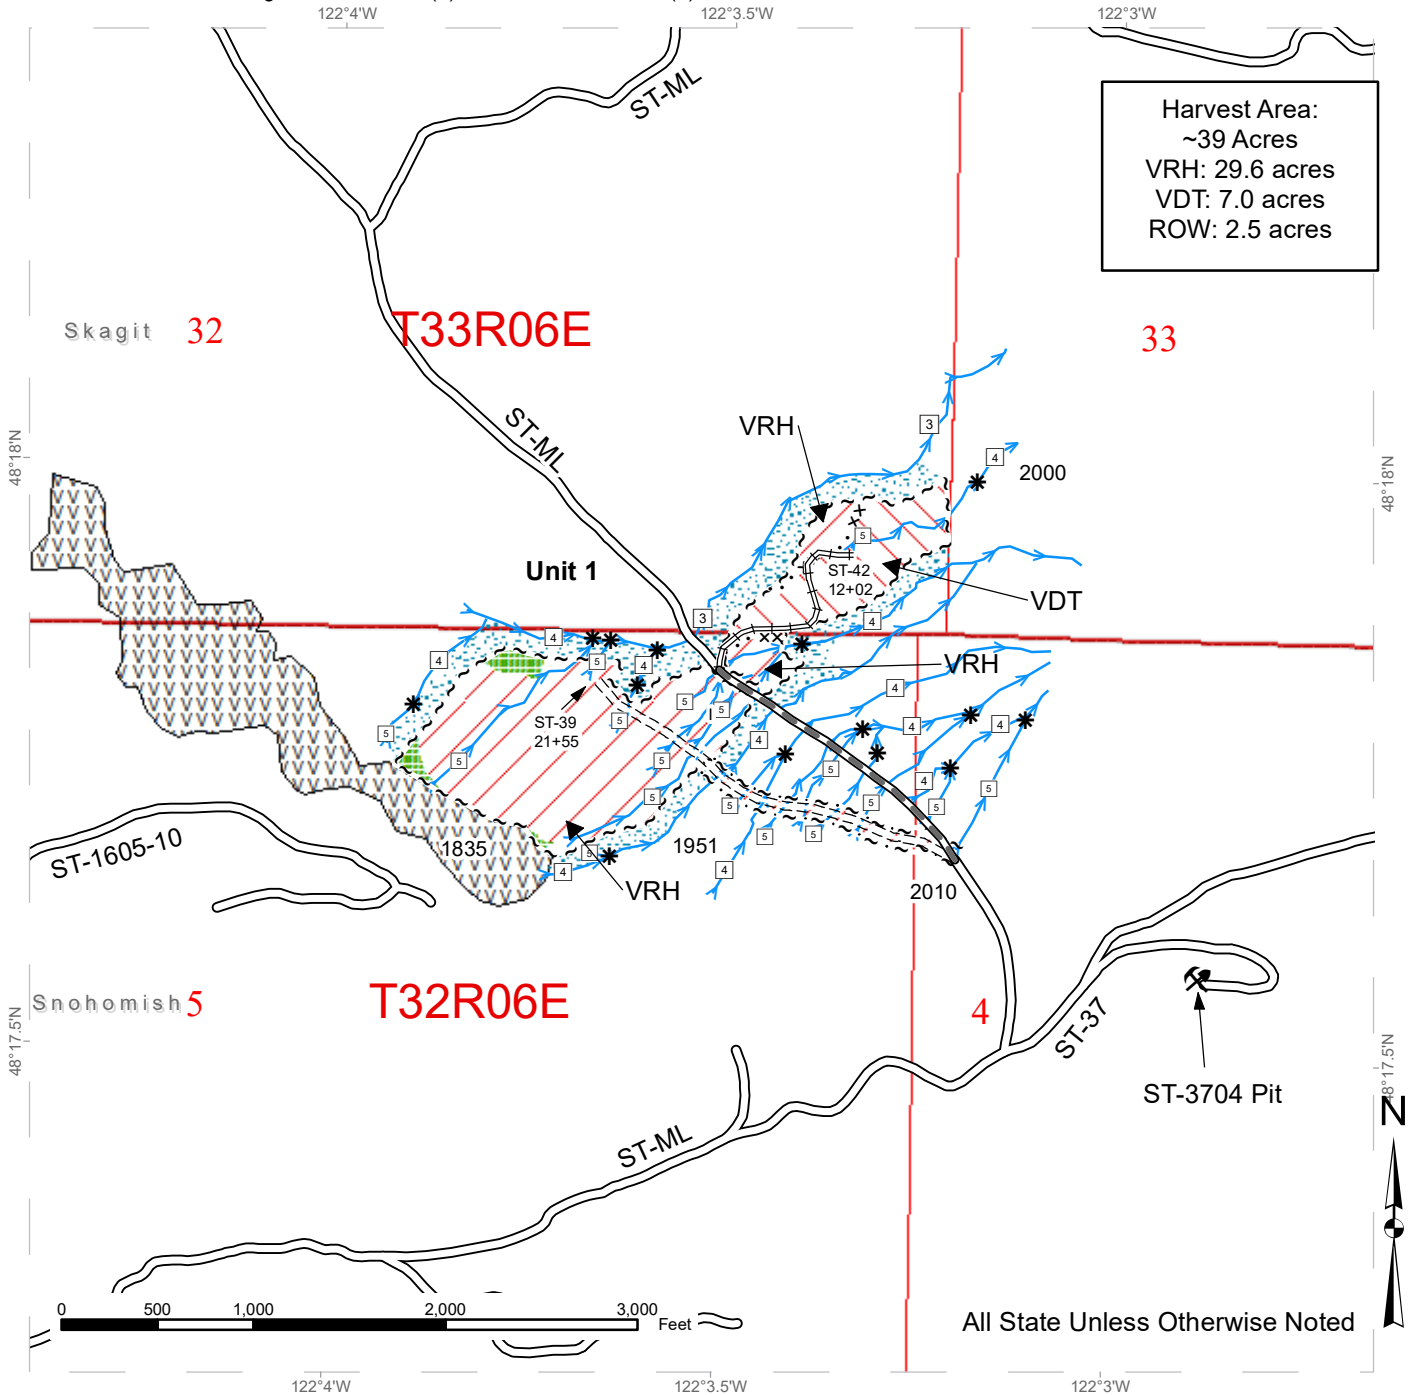

Western redcedar is not to be cut without prior approval of the Contract Administrator (CA). Only trees necessary to facilitate harvest operations or those which pose safety hazards shall be considered for approval.
