

# Timber, Fish and Wildlife Policy Committee

Wednesday, June 12, 2024 // 9:00AM – 10:00AM

Virtual Only: Zoom

Motions	
Motion	Move/Second (Vote)
<p><b>Eastside Type N Riparian Effectiveness Project (ENREP) Extended Monitoring</b></p> <p><b>Motion:</b> Rico Vinh moved to approve the TFW Policy Committee approves the collection of an additional year of post-harvest data for the ENREP study for the fiscal year 2025 as a separate appendix to the original study. The TFW Policy Committee reaffirms its commitment to receiving the ENREP study report as originally scheduled, two years post-harvest, and to take necessary action based on this report. An additional 1-4 years of post-harvest data collection may be authorized, contingent upon Policy consensus and availability of funds in the 2025-2027 biennium budget. The approval of this extension does not negate or imply that the original study design will fail to produce sufficient information for TFW Policy to act as required.</p> <p><b>Friendly amendment:</b></p> <p>The TFW Policy Committee approves the collection of one additional year of post-harvest data for the ENREP, beyond the approved study design two years post-harvest, for the fiscal year 2025. The additional data/ information will be included as a separate appendix to the original study. The TFW Policy Committee reaffirms its commitment to respond to the ENREP study report as originally scheduled, two years post-harvest, and will follow the timelines outlined in the DNR AMP Board Manual (Section 22) in determining the type of action to be taken based on this report. Additional years of post-harvest data collection may be considered, contingent upon Policy consensus and availability of funds in the 2025-2027 biennium budget. The approval of this extended monitoring does not negate or imply that the original study design will fail to produce sufficient information for TFW Policy to act as required.</p>	<p><b>Seconded:</b> Cody Thomas</p> <p><b>Up:</b> Brandon Austin/Chris Briggs, Rico Vinh, Cody Thomas, Ken Miller, Court Stanley, Marc Engel</p> <p><b>Down:</b></p> <p><b>Abstain:</b> Darin Cramer (seems like Policy is on the same page, yet the motion represents low confidence in trust in each other/the system adding unnecessary words that could cause confusion and represents a bias.)</p> <p><b>Absent:</b> Rob Purser</p>

The motion passed

### Eastside Type N Riparian Effectiveness Project (ENREP) Extended Monitoring

Brandon introduced the agenda item.

Rico adjusted his motion based on feedback from Darin to reference the Board Manual 22 TFW approval process: The TFW Policy Committee approves the collection of one additional year of post-harvest data for the ENREP, beyond the approved study design two years post-harvest, for the fiscal year 2025. The additional data/ information will be included as a separate appendix to the original study. The TFW Policy Committee reaffirms its commitment to respond to the ENREP study report as originally scheduled, two years post-harvest, and will follow the timelines outlined in the DNR AMP Board Manual (Section 22) in determining the type of action to be taken based on this report. Additional years of post-harvest data collection may be considered, contingent upon Policy consensus and availability of funds in the 2025-2027 biennium budget. The approval of this extended monitoring does not negate or imply that the original study design will fail to produce sufficient information for TFW Policy to act as required.

Darin proposed friendly amendment: The TFW Policy Committee approves the collection of an additional year of post-harvest data for the ENREP study for the fiscal year 2025 as a separate appendix to the original study. The TFW Policy Committee reaffirms its commitment to answering the Policy questions in BM 22 on page M22-31 upon receipt of the ENREP study report as originally scheduled, two years post-harvest. An additional 1-4 years of post-harvest data collection may be authorized, contingent upon Policy consensus and availability of funds in the 2025-2027 biennium budget.

The level of clarity is needed for Conservation Caucus to have full support. Darin says the last sentence, “The approval of this extended monitoring does not negate or imply that the original study design will fail to produce sufficient information for TFW Policy to act as required”, represents a bias and is unnecessary.

Lori congratulated TFW Policy on productive and successful continued discussions and negotiations on this extended monitoring request.

### List of Attendees

Attendees	Representing
§Austin, Brandon*	WDFW/TFW Policy Co-chair
§ Briggs, Chris*	Department of Ecology
§Cramer, Darin	Large Industrial Landowner Caucus/WFPA
§Engel, Marc	DNR
§Miller, Ken	Small Forest Landowner/WFFA

§Purser, Rob	Skokomish Tribe/Westside Tribes
§Stanley, Court	WSAC
§Thomas, Cody	Eastside Tribe Caucus/UCUT
§Vinh, Rico	WCA/Conservation Caucus
Clark, Lori	Adaptive Management Administrator
Henkel, Theryn	Supervisory Project Manager/DNR
Roberts, Dave (9-9:15am)	Small Forest Landowner/WFFA
Doug Hooks	Large Industrial Landowner Caucus/WFPA

§TFW Policy Voting Member
