APPENDIX A: LIST OF CORE PARTICIPATING AGENCIES AND PRIMARY POINTS OF CONTACT

The organizations listed below are considered the core partners of the Clearinghouse. The people listed for each organization are primarily program leads at their respective entity and are the primary points of contact for their organization. In a Clearinghouse activation, many more partners from within these agencies and from other entities will be called on, or will volunteer, to help respond. The names of people listed are those that we worked with to develop this plan when it was published in 2024. People may leave their current positions and this document will be updated every year or so to reflect that to the best of our ability.
