

Geologic Map of the Ellensburg North and Southern Half of the Reecer Canyon 7.5-minute Quadrangles, Kittitas County, Washington

Andrew J. Sadowski, J. Bodie McCosby, Megan L. Anderson, Todd R. Lau, Ashley Steiner, S. Andrew DuFrane, Tammy Rittenour, Bernard Housen

December 2020

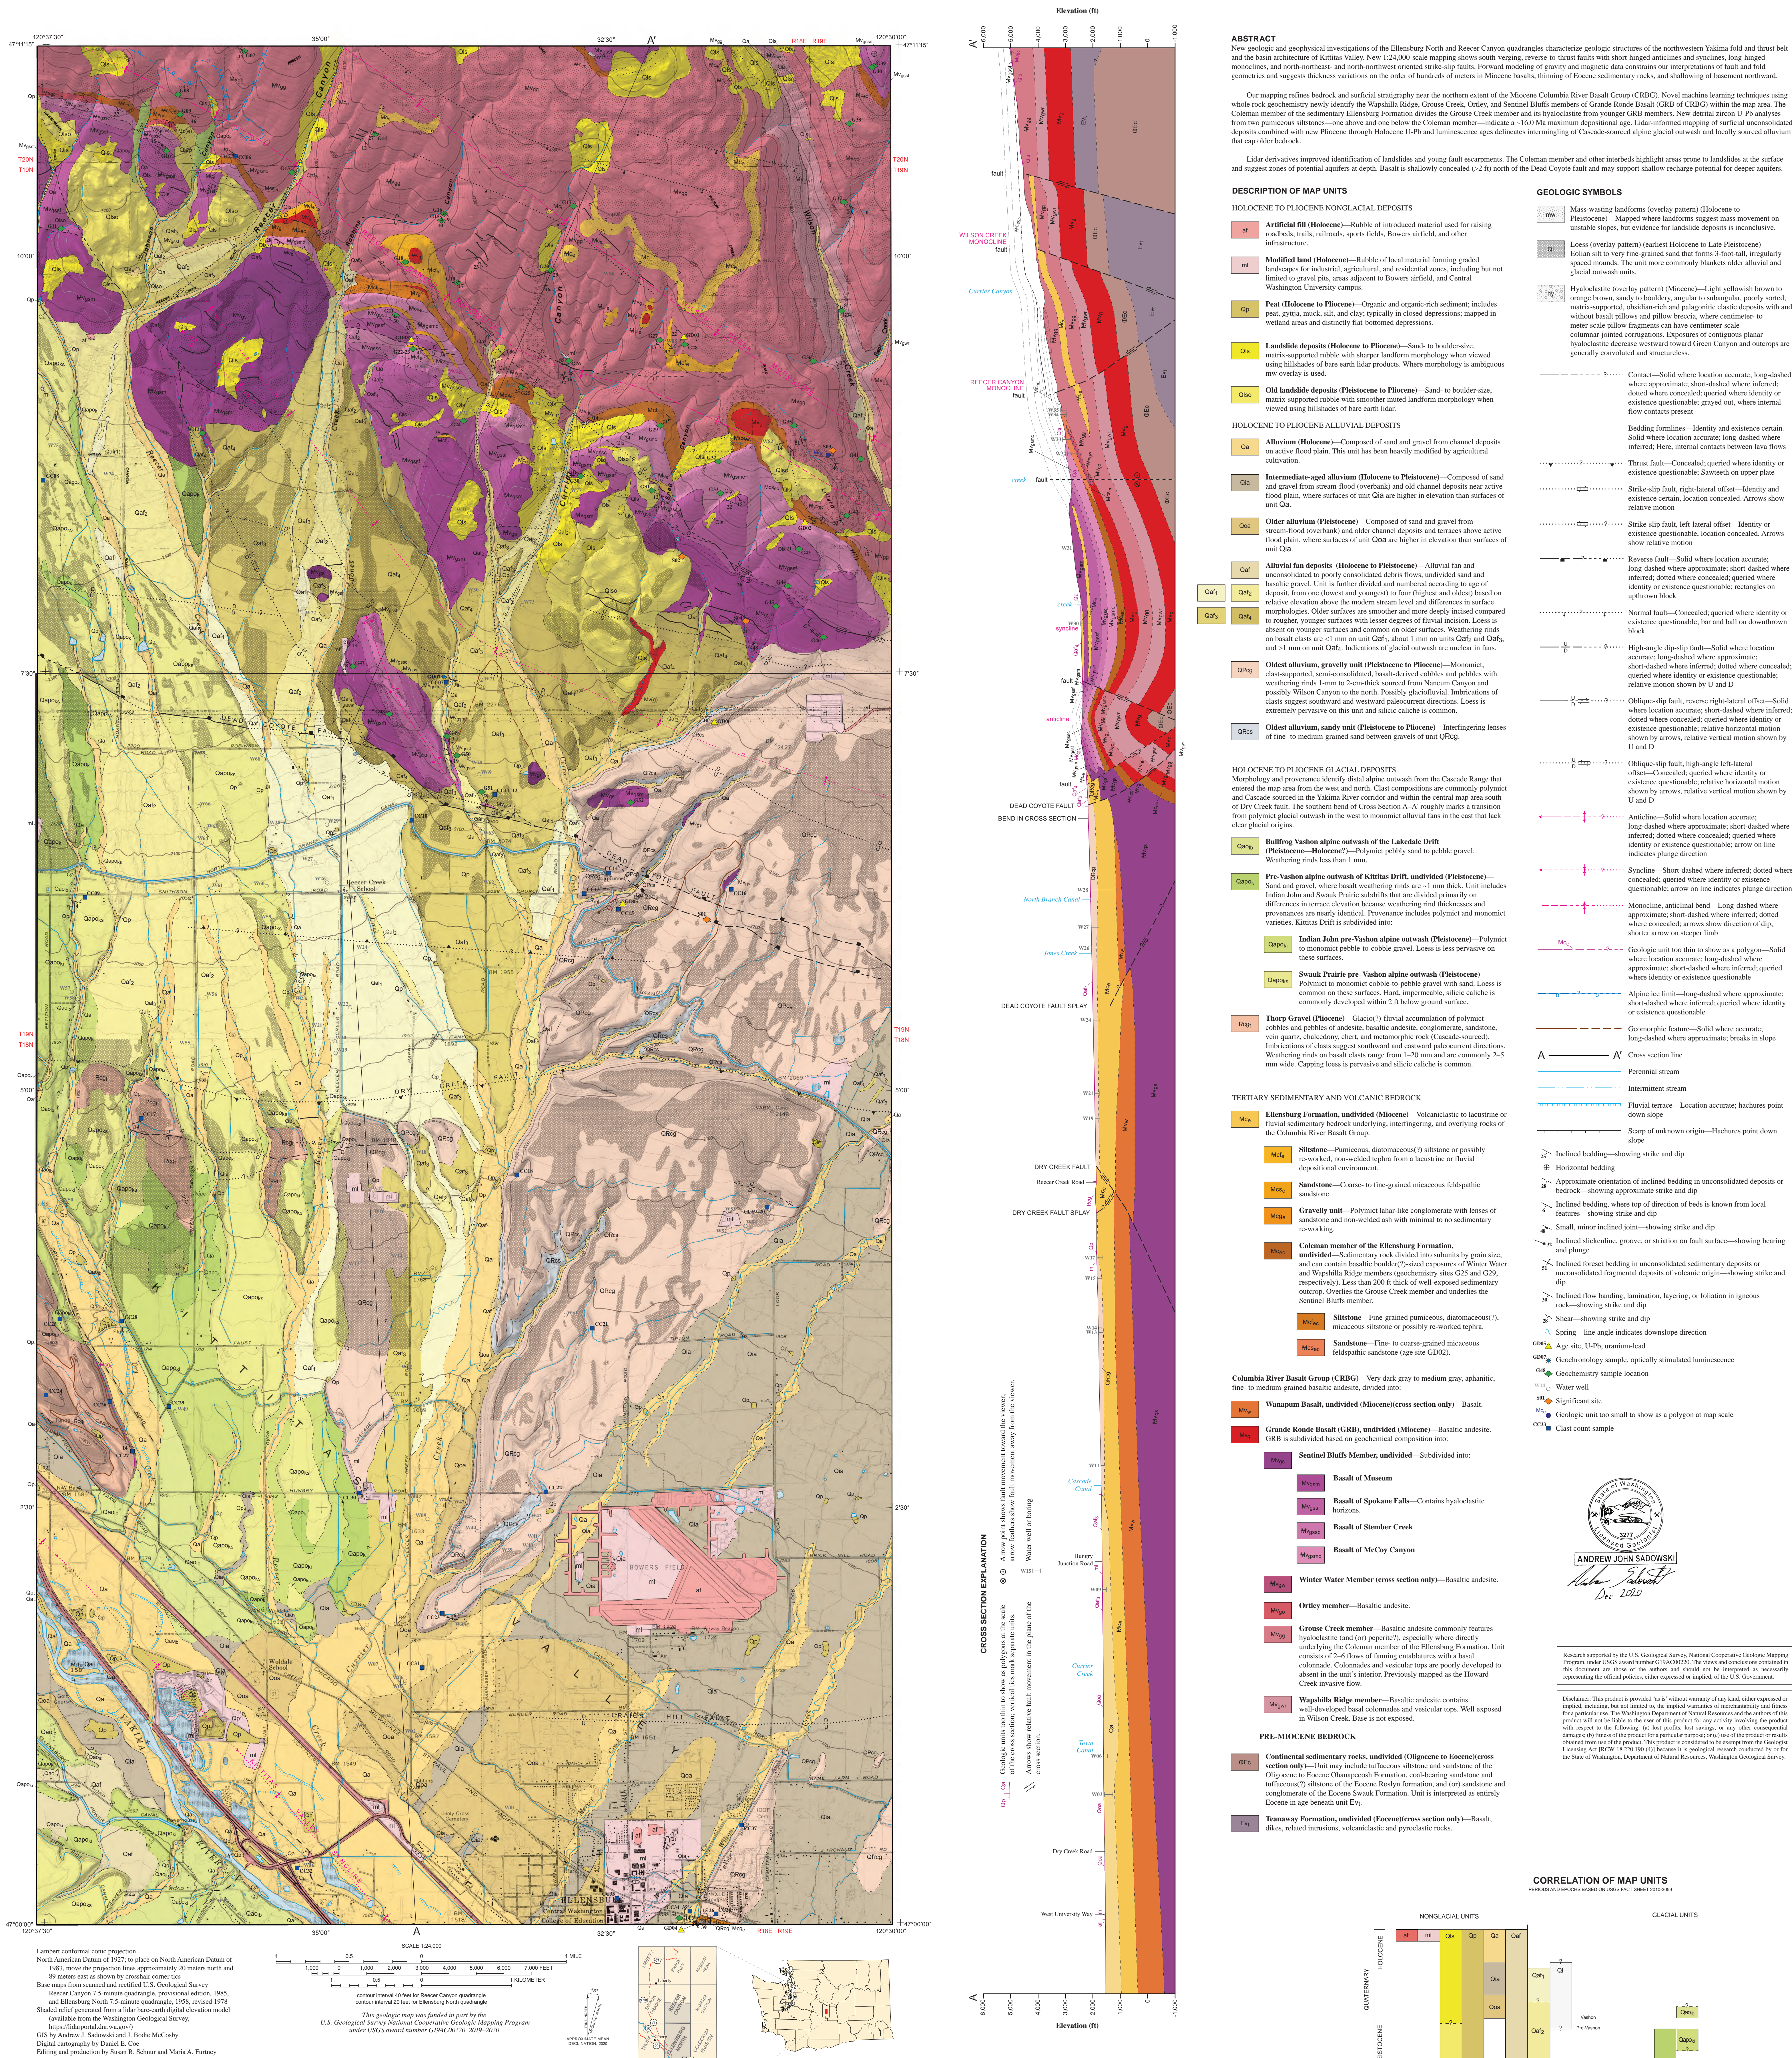

Figure M1. Geophysical interpretation for the map area. A: Contoured aeromagnetic gravity and aeromagnetic maps. Gravity contours are 0.5 mGal, magnetic contours are 10 nT. B: Two-dimensional geological cross-section A-A' through the map area. The map area is divided into two parts: the northern part (A) and the southern part (B). The northern part (A) shows the Ellensburg North 7.5-minute quadrangle, and the southern part (B) shows the Southern Half of the Reecer Canyon 7.5-minute quadrangle. The map area is divided into two parts: the northern part (A) and the southern part (B). The northern part (A) shows the Ellensburg North 7.5-minute quadrangle, and the southern part (B) shows the Southern Half of the Reecer Canyon 7.5-minute quadrangle.

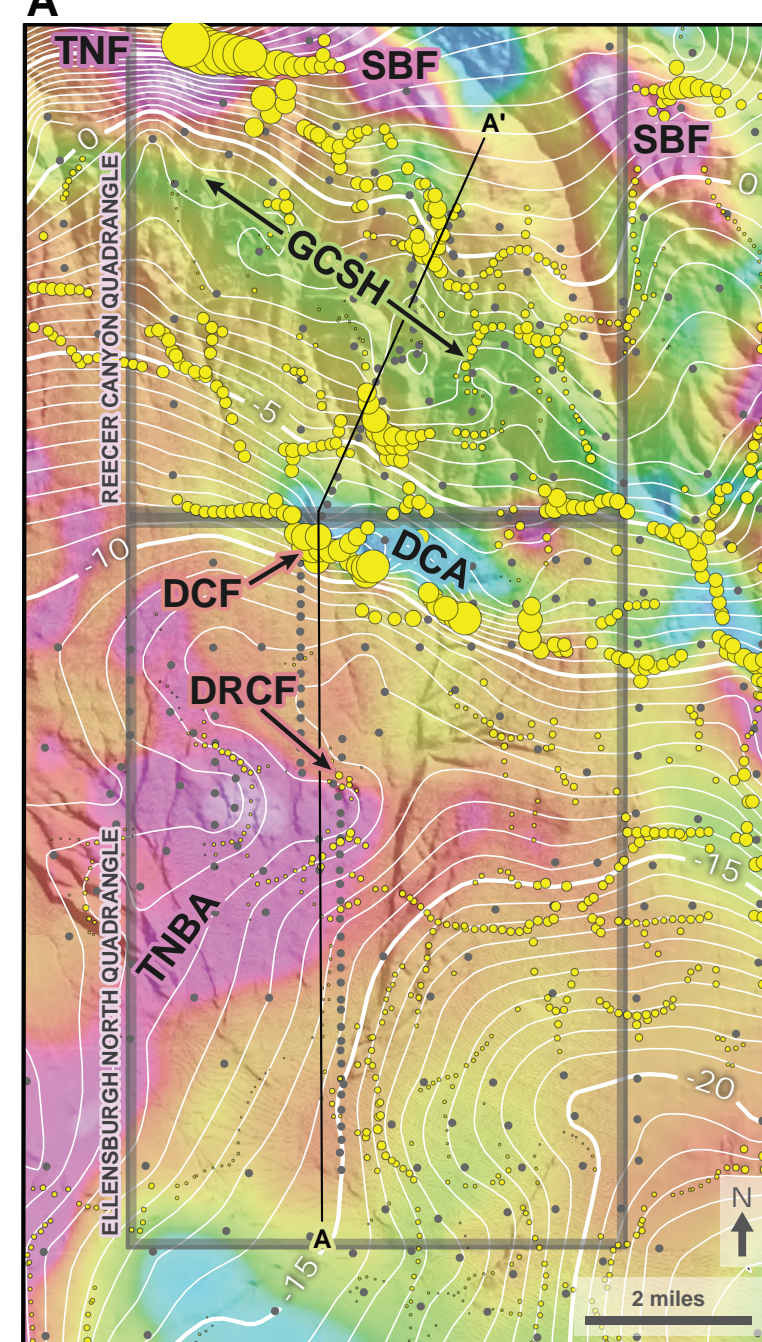

Figure M1. Geophysical interpretation for the map area. A: Contoured aeromagnetic gravity and aeromagnetic maps. Gravity contours are 0.5 mGal, magnetic contours are 10 nT. B: Two-dimensional geological cross-section A-A' through the map area. The map area is divided into two parts: the northern part (A) and the southern part (B). The northern part (A) shows the Ellensburg North 7.5-minute quadrangle, and the southern part (B) shows the Southern Half of the Reecer Canyon 7.5-minute quadrangle. The map area is divided into two parts: the northern part (A) and the southern part (B). The northern part (A) shows the Ellensburg North 7.5-minute quadrangle, and the southern part (B) shows the Southern Half of the Reecer Canyon 7.5-minute quadrangle.
