Advisory Solution  
Architect

**Kathy Driscoll**  
Sr. Director,  
Professional Services,

**Deepak Vedarthan**  
VP of Professional  
Services

# Demonstration

# Q&A

# Training

## What is the Training Plan for fpOnline?

fpOnline Training will be custom designed for system administrators, staff, super users, and community users. The training has three certification levels:

### 1. Fundamental Training Series

For all users; covers basic navigation and functionality of fpOnline, and includes hands-on experience.

### 2. System Administrator Certification

For admins who will manage system security and user access, and make functional changes.

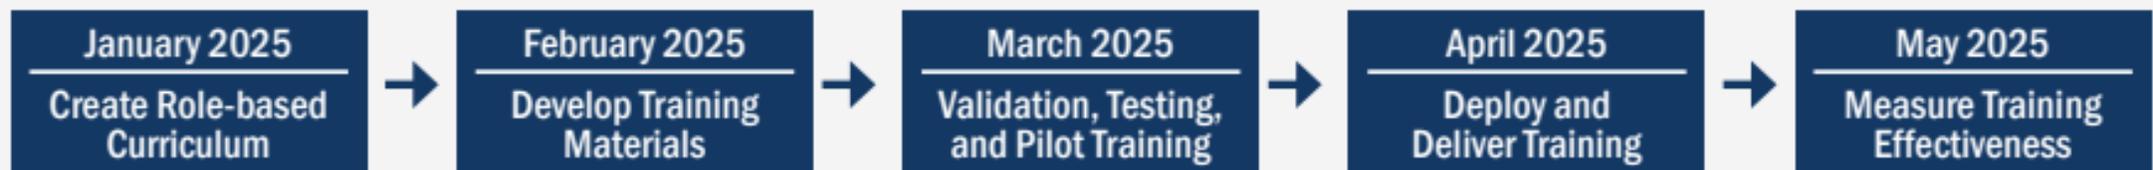

### 3. Implementer Certification

Advanced technical training on how to write scripts; manage queries; and create iForms, workflows, analytic data models, and reports.

**Train-The-Trainer Program.** Training will be conducted in each Region by DNR Trainers who have completed VisualVault's Train-The-Trainer Program. DNR Trainers will be selected based on their understanding and interaction with the fpOnline application, and their knowledge of DNR's Forest Practices Program business processes.

**Measuring Effectiveness.** The fpOnline Training Team will formally monitor end-user training sessions. Monitoring supports consistent delivery of the training experience and ensures the feedback provided improves future training events.

The training process will begin in 2025:

# Thank You!
