## 2.5 COMPLAINT, DEBRIEF AND PROTEST PROCEDURES

### COMPLAINT PROCESS – PRIOR TO BID DUE DATE:

The purpose of a complaint process is to settle unresolved issues or concerns that either were not or could not be resolved during the question and answer period.

Any Bidder may submit a complaint regarding this solicitation based upon the following:

- The solicitation unnecessarily restricts competition;
- The evaluation/scoring process is unfair or flawed; or
- The requirements are inadequate or insufficient so that a response/bid is difficult to prepare.

Complaints not based on procedural matters will not be considered. Complaints will be rejected as without merit if they address issues such as: 1) an evaluator's professional judgment on the quality of a proposal, or 2) Agency's assessment of its own and/or other agencies needs or requirements.

If no complaint is filed, a Bidder cannot later file a protest based on one of the above complaint criteria.

Any complaint to the solicitation must be in writing and submitted to the Bid Coordinator no less than five (5) business days prior to the date when the bid is due, and shall clearly articulate the basis for the complaint and include a proposed remedy.

Responses to complaints will be articulated in writing, including any resulting changes to the solicitation, and will be posted on WEBS, and the Agency head will be notified.

The Agency's decision is final; no further administrative appeal is available.

#### DEBRIEFING OF UNSUCCESSFUL BIDDERS:

Any Bidder who has submitted a bid and been notified that they were not selected for contract award may request a debriefing. The request for a debriefing conference must be received by the Bid Coordinator within three (3) business days after the Unsuccessful Bidder notification is e-mailed to the Bidder. The debriefing must be held within three (3) business days of the request.

Discussion at the debriefing conference will be limited to the following:

- Evaluation and scoring of the Bidder's bid;
- Critique of the bid based on the evaluation; and
- Review of Bidder's final score in comparison with other final scores without identifying the other firms.

Comparisons between bids or evaluations of the other bids will not be allowed. Debriefing conferences may be conducted in person or on the telephone and will be scheduled for a maximum of one hour.

#### PROTEST PROCEDURE:

This procedure is available to Bidders who submitted a response to this solicitation and who have participated in a debriefing conference. Upon completing the debriefing conference, the Bidder is allowed five (5) business days to file a protest of the acquisition with the Bid Coordinator. Protests must be submitted in writing via e-mail and signed by the protesting party or an authorized Agent.

The protest must state the grounds for the protest with specific and complete statements of the action(s) being protested. A description of the relief or corrective action being requested should also be included.

Bidders protesting this procurement shall follow the procedures described below. Protests that do not follow these procedures shall not be considered. This protest procedure constitutes the sole administrative remedy available to Bidders under this procurement.

Only protests stipulating an issue of fact concerning the following subjects shall be considered:

- A matter of bias, discrimination or conflict of interest on the part of the evaluator;
- Errors in computing the score;
- Non-compliance with procedures described in the solicitation document, or applicable state or federal laws or regulations.

Upon receipt of a protest, a protest review will be held by the Agency. All available facts will be considered and a decision will be issued by the Commissioner of Public Lands or his/her delegate within five (5) business days of receipt of the protest. If additional time is required, the protesting party will be notified of the delay.

In the event a protest may affect the interest of another Bidder who submitted a bid, such Bidder will be given an opportunity to submit its views and any relevant information on the protest to the Bid Coordinator.

The final determination of the protest shall:

- Find the protest lacking in merit and uphold the Agency's action; or
- Find only technical or harmless errors in the Agency's acquisition process conduct and determine the Agency to be in substantial compliance and reject the protest; or
- Find merit in the protest and provide the Agency options which may include:
  - Correct the errors and re-evaluate all bids, quotations and/or proposals; and/or
  - Reissue the solicitation document; and/or
  - Make other findings and determine other courses of action as appropriate.

If the Agency determines that the protest is without merit, the Agency will enter into a contract with the Apparent Successful Bidder.

The Agency protest decision is final and no appeal process will be required. If a protesting Bidder does not accept the Agency protest response, the Bidder may try to seek relief from Thurston County Superior Court.

## **2.6 PROPRIETARY INFORMATION/PUBLIC DISCLOSURE**

Bids, quotations and/or proposals submitted in response to this solicitation shall become the property of the Agency. All bids, quotations and/or proposals received shall remain confidential until the contract, if any, resulting from this solicitation is signed by the Agency and the Apparent Successful Bidder; thereafter, the bids, quotations and/or proposals shall be deemed public records as defined in Chapter 42.56 of the Revised Code of Washington (RCW).

Any information in the bid, quotation and/or proposal that the Bidder desires to claim as proprietary and exempt from disclosure under the provisions of Chapter 42.56 RCW, or other state or federal law that provides for the nondisclosure of your document, must be clearly designated. The information must be clearly identified and the particular exemption from disclosure upon which the Bidder is making the claim must be cited. Each page containing the information claimed to be exempt from disclosure must be clearly identified by the words "Proprietary Information" printed on the lower right hand corner of the page. Marking the entire bid, quotation and/or proposal exempt from disclosure or as Proprietary Information will not be honored.

If a public records request is made for the information that the Bidder has marked as "Proprietary Information," the Agency will notify the Bidder of the request and of the date that the records will be released to the requester unless the Bidder obtains a court order enjoining that disclosure. If the Bidder fails to obtain the court order enjoining disclosure, the Agency will release the requested information on the date specified. If a Bidder obtains a court order from a court of competent jurisdiction enjoining disclosure pursuant to Chapter 42.56 RCW, or other state or federal law that provides for nondisclosure, the Agency shall maintain the confidentiality of the Bidder information per the court order.

Pursuant to RCW 42.56.120, DNR uses the default fee schedule. However, records may be viewed in person for no fee. Equipment shall be considered free of soil, seed, and other such debris when a visual inspection does not disclose such material. Compliance Forester reserves the right to also require the cleaning of equipment as required by this clause in cases where equipment is being moved onto nonfederal lands.

Contractor shall notify Compliance Forester in advance of moving all equipment onto US Forest Service lands. Notification will include a location approved by Compliance Forester where the equipment will be cleaned by Contractor and made available for inspection by the Compliance Forester at a time agreed by the Parties. Only equipment cleaned as required under this clause, and inspected by Compliance Forester (or designee), will be allowed to operate on federal lands within the sale area. All subsequent move-ins of equipment to the project area shall be treated in the same manner as the initial move in. The Federal Endangered Species Act of 1973 (ESA), 16 USC § 1531 et seq., prohibits a person from taking any federally listed threatened or endangered species. Taking under the federal ESA may include alteration of habitat. Neither this Contract, nor the State's approval of Contractor's Plan of Operations, is certification that Contractor's operations under the plan are lawful under the ESA. Contractor's compliance with the plan is not in lieu of compliance with any federal requirements under the ESA or its implementing regulations.

**A-41 Federal Debarment and Suspension**

Contractor certifies by signature of its authorized representative as affixed below, that neither it nor any of its principals, are presently debarred suspended, proposed for debarment or suspension, declared ineligible, or voluntarily excluded from participation in any contract with the Federal Government.

No further work shall be allowed on the site until the Forest Archeologist has approved a plan for managing or preserving the remains or items.

**A-45 Non-Discrimination in Employment**

In connection with the performance of work under this Contract, Contractor agrees not to discriminate against any applicant for employment, employee, or independent contractor based on race, color, national origin, sex, religion, age, disability, sexual orientation, or marital status. Contractor agrees to comply with all federal and state laws governing non-discrimination in employment applicable to the work performed under the Contract.

## SECTION I-B: SPECIFICATIONS FOR THE ACTIVITY

Contractor shall perform hazardous fuels reduction work as described below.

### **B-01 Precedence between Sections**

Section I-B covers the general standards that apply over the whole contract. If a change is required on a site by site basis those differences will be outlined on the Unit Description (Section II-A). The site specific details found on the Unit Description should take precedence over these general guidelines when they exist. If special requirements noted in the Unit Description conflict with requirements in this Section, the special requirements will prevail.

### **B-02 Boundaries**

The boundaries depicted on Unit Map (Section II-B) delineate the Work area. Contractor is responsible for completing all Work to boundaries. The boundaries will consist of easily identifiable features (including but not limited to roads, streams, or abrupt changes in forest type or age). Timber sale boundary tags with orange flashers and pink flagging, yellow Leave Tree Area tags, and red flagging will be used for areas where identifiable features are absent. Contractor is responsible for understanding the location of all boundaries. Failure to complete Work to boundaries in any Unit renders Work in that Unit incomplete, and no payment will be made to Contractor for any Work on that Unit. No payment will be provided for Unit(s) with Work that extends beyond Unit boundaries. Work extending beyond Unit boundaries will be considered breach of contract. See Clause A-23, above.

### **B-03 Contractor shall furnish:**

The Contractor shall provide all of the following at its own expense:

- A. All workers, adequate crew supervision, and serviceable equipment to satisfactorily accomplish treatment of all acres identified in the Unit Descriptions (Section II-A).
- B. Equipment operators that are skilled in machine operation on the equipment offered under comparable working conditions.
- C. Transportation for all workers, supplies, materials, and equipment to and from the Unit(s).
- D. All supplies, materials, and equipment needed to ensure safe operations.
- E. The equipment being used shall be a track mounted excavator which meets the following specifications to adequately pile slash as detailed in Clause B-06:
  - i. Ground Pressure – maximum 8 PSI. PSI will be determined using this formula:
$$\text{PSI} = \frac{(\text{Inches of track on ground} \times \text{inches of track width}) \times 2}{\text{Weight of Equipment}}$$
  - ii. Capability – machine must have the capability of picking up wood debris between 1 inch and 20 inches in diameter, while at the same time allowing all loose soil and duff to fall free so it is not placed into the pile. To do this, the machine shall be equipped with a *grapple or claw rake and thumb*. **No bucket and thumb will be allowed for piling slash.**
  - iii. Climbing ability – up to 40% slope. Steep and short pitches are allowed with approval from Compliance Forester.

- iv. Pivot – attachment arm shall be able to swing 360 degrees while the tracks remain stationary.
- v. Reach – attachment arm shall have a minimum reach of 15 feet.
- vi. Equipment must have a closed cab and adequate guarding to protect the machine and operator from falling material or debris.

F. All costs of operation and maintenance not specifically furnished by the DNR

**B-04 DNR shall furnish:**

- A. Compliance Forester(s) to acquaint the Contractor with each unit to be worked and to conduct periodic field inspections.
- B. Boundary marking, georeferenced maps, and access to the unit as reasonably necessary to complete the contract.

**B-05 Weather Conditions**

Operations may be suspended when the Compliance Forester determines that weather conditions will cause excessive soil damage due to high soil moisture content or snow depth prevents adequate visibility of fuels. Suspended operations shall not resume unless approval to do so has been given, in writing, by the Compliance Forester.

**B-06 Piling Specifications**

Contractor will use approved equipment (clause B-03-E) to accomplish the following in all units

A. Piling of Slash

- i. The Contractor shall pile slash and woody material from 1 to 10 inches in diameter over 4 feet in length while retaining a minimum of 35-50% soil cover.
- ii. Contractor will work to leave (not pile) between 6-20 tons per acre of coarse woody material throughout the units. Coarse woody material is defined as woody material greater than 3 inches in diameter).
- iii. Contractor shall attempt to place slash of various sizes into each pile and avoid piling concentrations of only large logs and stumps.
- iv. The Contractor shall leave all logs that are greater than 10.1 inches diameter at the small end and longer than 10 feet in length in place.
- v. If a unit contains previously burned landing piles, Contractor shall re-construct any remains that may not have burned and ensure that excessive dirt and other unburnable debris are adequately shaken out. Where there is not enough slash to re-pile in a landing, material may be scattered and mixed into soil during the decompaction of the landing. Re-piled landings are to be decompacted to a depth of 6 inches once piling in the area is completed. Re-constructed landing piles are permitted to be larger than the target pile size as indicated below in B-06-C(i).

B. Location of Piles

- i. Contractor is required to monitor pile placement closely so that subsequent burning does not cause excessive crown scorch or bole scorch to leave trees, snags, or seed wall trees.
- ii. Contractor shall construct piles as far away from designated leave trees as feasible.
- iii. Piles shall be located within contract unit boundaries.

- iv. Piles shall be located at least 10 feet from unit boundaries indicated as cut edge with Timber Sale Boundary tags with orange flashers and pink flagging, yellow Leave Tree Area tags, or red flagging. See Section II-A: Unit Descriptions for more detail.
- v. Piles should be located at least 20 feet from fences and other improvements.
- vi. Piles shall not be located on any road prism or any ditch line.
- vii. Piles shall not be located next to existing snags. A snag is any dead standing tree greater than 20 feet in height and 16 inch DBH.

C. Construction and Size of Machine Piles

- i. Target machine pile size to 15 feet in diameter and 10 feet in height.
- ii. Mechanical piles shall be compacted (smashed down) to minimize air space and assist with protection of the debris from penetration by precipitation prior to burning.
- iii. All piles shall be relatively free of dirt and decomposed duff. No soil other than that adhering to the bark or root wads will be acceptable in the piles.
- iv. To allow for maximum fuel consumption during ignition, ensure that boles extending 10 feet beyond the general side contours of the piles are limited.

**B-07 Road Decommissioning**

Road decommissioning features are virtually marked using a georeferenced pdf map. A georeferenced pdf map will be provided. Contractor is responsible for providing a phone or tablet that is able to run Avenza or similar mapping applications to reference the map.

The following roads or segments of roads shall be decommissioned by the Contractor:

Road	Station
Temp 4	0+00 to 23+39
Jump Spur	0+00 to 9+93

Contractor shall perform road decommissioning of **3,332 feet** of existing non-system road within **Units 3 and 4:**

- i. Recontour road prism to a “natural” condition by removing ditches, ruts and berms.
- ii. Rip/de-compact the road prism surface to a minimum depth of 18 inches.
- iii. Remove embankments, side-cast fill and place material into cut-banks; shape banks to conform to natural ground features.
- iv. Pull back unstable fill that has potential of failing and entering any waters or wetlands. Place and compact removed material in a stable location.
- v. Scatter woody debris onto surface of decommissioned roads to control erosion.
- vi. Remove culverts at 12+90, 15+33, and 16+78 of Temp 4. Leave the resulting trench open and shape to blend with the surrounding natural landscape. Slope all trench walls no steeper than 1.5:1.
- vii. Culverts removed from roads become the property of the Contractor and must be removed from federal land.
- viii. Remove >90% of rock for approximately **221 feet** of road in two areas, as indicated on map (approximately 240 cubic yards). Rock must be transported to Ruby Quarry (approximately 8.1 mi). Minimize removing organic debris/soil with rock as much as possible.
- ix. Remove all fabric barrier for approximately **221 feet** of road in two areas, as indicated on map. Minimize tearing of fabric to ensure its removal. Contractor shall remove fabric from federal land and assume responsibility for its proper disposal.

**B-08 Progression of Daily Work**

Contractor work shall progress in an orderly fashion to avoid accidentally leaving untreated areas, with workers regularly connecting treated areas. At the end of each work day, no “islands” of untreated areas shall be left within areas that have been treated.

**B-09 Fences and Improvements**

Contractor shall not damage fences and other improvements (e.g., water developments, monumented corners, road surfaces and/or drainage structures) within or adjacent to the Units the piling operation. Any such damage will be repaired at Contractor's expense back to existing condition prior to damage. All slash falling on fences and other improvements shall be removed and distributed back into the unit by Contractor.

**B-10 Resource Protection Requirements**

- A. Work shall be accomplished with the least possible damage to the residual stand, soil, and roadbeds. If Contractor operations cause excessive damage, the Contractor shall alter operations to prevent the occurrence of such damage. Failure to alter operations within one day of written notice and/or repeated failure to conduct operations in such a manner as to prevent excessive damage, may be cause for contract termination for default or cause.
- B. Contractor shall rehabilitate any areas where Contractor operations caused excessive soil or roadbed damage. Rehabilitation work shall occur during weather and soil conditions approved by the Compliance Forester.
- C. Equipment must be washed and inspected by the Compliance Forester prior to working on U.S Forest Service land to prevent the spread of invasive species and contaminated soils.
- D. Equipment will be inspected and determined to be free of any fluid leakage prior to project implementation.
- E. Mechanical equipment shall not cross meadows, stream channels (wet or dry), or other non-work areas unless approved by the Compliance Forester.
- F. Protect all hardwoods and conifer trees marked, or otherwise designated, as seed trees or wildlife reserve trees. Leave all standing snags or cull trees greater than 16” diameter unless they create a safety hazard.
- G. Minimize compaction, rutting, and erosion by avoiding activities during wet conditions.
- H. Fueling of equipment, parking and staging areas will not be allowed within 50 feet of a stream.
- I. Protect legal land subdivision survey corners and/or witness objects. If destroyed or disturbed, such points shall be re-established by a licensed land surveyor in accordance with the U.S. General Land Office Standards at Contractor’s expense. DNR shall determine the method for accomplishing this work, either by withholding sufficient performance security to pay for the work, or by requiring Contractor to do so before releasing Contractor’s performance security.
- J. Construct or re-construct spoils berms, dips, water bars, cross drains, ditches and/or other

drainage control structures that are altered or damaged by Contractor's operations.

- K. Contractor will operate on skid trails and on slash whenever possible to reduce soil compaction.

**B-11 Slash in Roads and Buffer Zones**

Slash or debris resulting from the hazardous fuels reduction operation, that falls into roads, ditches, road banks, culvert inlets / outlets or designated buffer zones, shall be removed by Contractor and redistributed within the Unit(s) at the end of every day, or more often on well-traveled roads.

## SECTION I-C: UNIT COMPLIANCE INSPECTION AND PAYMENT

### **C-01 Determination of Payment**

Compliance and payment for work performed will be based on the following:

- A. Work completed to boundaries (see Clause B-02). If work extends beyond unit boundaries, charges may be levied against the Contractor by the DNR for damages suffered by DNR, or by other parties suffering damages, including the U.S. Forest Service.

### **C-02 Determination of Satisfactorily Completed Work**

Satisfactorily completed work will be determined using the following criteria:

#### **A. Satisfactory Performance**

‘Satisfactory Performance’ on the Unit is when all Work has been completed to boundaries (Clause B-02), all piling specifications (Clause B-06) have been met throughout the entire Unit, and all resource protection requirements (Clause B-10) have been met throughout the entire Unit.

#### **B. Unsatisfactory Performance**

‘Unsatisfactory Performance’ on the Unit is when one or more of the following have occurred: 1) Work has not been completed to boundaries (Clause B-02); 2) all piling specifications (Clause B-06) have not been met throughout the entire Unit; or 3) not all resource protection requirements (Clause B-10) have been met throughout the entire Unit.

#### **C. Rate of Pay**

The ‘Rate of Pay’ is the actual amount (in dollars) that the Contractor will be paid per acre for each Unit. The Rate of Pay is equal to the Unit Bid Price for Units with Satisfactory Performance. The Rate of Pay is the Unit Bid Price minus any reductions in payment (Clause C-02-D) for Units with Unsatisfactory Performance. The Rate of Pay will not exceed the Unit Bid Price for any Unit.

#### **D. Reduction in Payment**

The reduction in payment for Unsatisfactory Performance on a Unit will be calculated for the Unit in one of the following ways, at the Compliance Forester’s sole discretion:

1. If Work on the Unit is not completed to boundaries (Clause B-02), DNR can either withhold payment for the entire Unit, or reduce payment by the number of untreated acres multiplied by the average bid price per acre. The number of untreated acres shall not include areas that could not be treated due to solid rock outcrops, steep slopes, wetlands, or other features on site.
2. If Unsatisfactory Performance is due to all piling specifications (Clause B-06) not having been met throughout the entire Unit, DNR can either withhold payment for the entire Unit, or reduce payment by the number of untreated acres multiplied by the average bid price per acre. The number of unsatisfactorily treated acres shall not include areas that could not be treated due to solid rock outcrops, steep slopes, wetlands, or other features on site.

3. If Unsatisfactory Performance is due to resource protection requirements (Clause B-10) not having been met throughout the entire Unit, then DNR will reduce payment by calculating the cost to remedy the damage. If no remedy is possible, then payment may be withheld for the entire Unit.

### **C-03 Unsatisfactory Work Compliance**

The Compliance Forester may require Contractor to re-work a Unit that has Unsatisfactory Performance (Clause C-02-B). The Compliance Forester may require the re-work to be completed prior to starting Work on a new Unit. The Compliance Forester will re-inspect the Unit following the re-work to determine if it now meets Satisfactory Performance requirements (Clause C-02-A).

If Contractor refuses to re-work the Unit, DNR may then pursue its available remedies for either breach (Clause A-23) or default (Clause A-24) of contract. If Contractor re-works the Unit and it is rated unsatisfactory a second time, DNR may consider this breach or default of contract.

The Compliance Forester is not required to give Contractor the opportunity to re-work Unit(s) with Unsatisfactory Performance (Clause C-02-B). In some cases, DNR may not have the additional staff needed to perform contract compliance for such re-work, and Contractor's overall performance on this contract may indicate that Contractor will be unable to improve the quality of Work enough to justify the additional time and expense of re-working Unit(s). In these cases, the Compliance Forester may choose to simply calculate the correct reduction in payment in accordance with Clause C-02-D and allow Contractor to continue Work on other Unit(s).

### **C-04 Payment shall be made as follows:**

Payment may be made by the month, unit or by one total payment. Details of payment schedule will be determined in the pre-work conference. The DNR will attempt to comply with the desires and needs of the Contractor but assumes no legal duty or obligations to adhere to the schedule of payments so arranged.

### **C-05 Partial payment**

Partial payment may be made upon completion of part of a unit as determined by the DNR. Request for partial payment is to be made by the Contractor utilizing the Contractor's Billing Invoice and Compliance Report provided by the DNR. The Contractor or contract representative identified during pre-work conference (Clause A-18) shall sign the Contractor's Billing Invoice and Compliance Report after completion of each such "sub-unit" being submitted for payment. The DNR Representative will then make payment recommendations for the invoice and forward the Contractor's Billing Invoice and Compliance Report to the DNR's Region office for processing.

- A. Contractor or contract representative and the DNR Representative shall sign the Contractor's Billing Invoice and Compliance Report form at the conclusion of work on each unit. Final payment will not be made to the Contractor unless the Contractor's Billing Invoice and Compliance Report form are signed by the Contractor or contract representative and the DNR Representative, and "final" payment is designated thereon.
- B. If a unit's contract acreage is disputed the Contractor may upon completion of the unit request a verification traverse by the DNR; the request must be in writing and signed by the Contractor. The DNR will pay the Contractor based on acres determined from the verification traverse. If the verification traverse indicates the net acres specified in the Unit Description are correct within plus or minus five percent (5%) the Contractor shall pay the cost of the

verification traverse at a rate of ten dollars (\$10.00) per one hundred (100) feet of traversed boundary.

**C-06 Liquidated damages**

Damages will be assessed for any and all delays extending beyond the final contract completion date according to the following schedule based on growth losses resulting from delays. Delays beyond the Contractor's control, resulting from Acts of God, and/or shutdowns or delays imposed by the DNR because of fire conditions, weather, threat of insect damage, conflict with other operations, and labor strikes will not count toward the contract time period, and lieu-time extending beyond the original completion date will be earned for such delays.

**Schedule of Liquidated Damages**

	High Site (S.I. 110+)	Low Site (S.I. 110 and below)
Lost Growth Value per acre per season*	\$10/Ac/Yr	\$5/Ac/Yr
	\$1.43/Ac/Mo	\$.71/Ac/Mo

Note: Ages less than 10 years deduct 33%  
 Ages 10-14 use full value  
 Ages 15-19 years deduct 33%  
 Ages 20 years + deduct 66%

\*Season refers to growing season. Defined as March 15 through October 15, a total of seven (7) months. Proration for parts of the year will be from mid-month to mid-month, 1/7 of the total above per monthly period, based on whole months only. No damages will be assessed for extension or delays outside the growing season.

Subject: Pernsteiner - Easement Acq.

To: Regional Forester, R-6

Enclosed is the recorded easement from George and Agnes G. Pernsteiner. This easement is a regrant. In 1936 Kilian Pernsteiner granted to the U.S. an easement over this road. The easement was never recorded.

In subsequent conversations, Mr. Pernsteiner stated he would grant a new easement to replace the old one. This was done on the new format.

Sincerely,

RIGHT-OF-WAY EASEMENT DEED

THIS EASEMENT, dated this 26 day of July, 19 91, from George Pernsteiner and Agnes G. Pernsteiner, husband and wife, hereinafter called "Grantor," to the United States of America, hereinafter called "Grantee,"

WITNESSETH:

Grantor, for and in consideration of \$1.00 and other considerations, received by Grantor, does hereby grant and convey unto the Grantee and its assigns a perpetual easement for a road over and across the following described lands in the County of Pend Oreille, State of Washington.

T. 35 N., R. 42 E. W.M.  
sec. 15, SW1/4SE1/4.

Said easement is shown on the plat attached hereto market Exhibit A.

Said easement shall be 33 feet on each side of the centerline with such additional width as required for accommodation and protection of cuts and fills. If the road is located substantially as described herein, the centerline of said road as constructed is hereby deemed accepted by Grantor and Grantee as the true centerline of the easement granted. If any subsequent survey of the road shows that any portion of the road, although located substantially as described, crosses lands of the Grantor not described herein, the easement shall be amended to include the additional lands traversed; if any lands described herein are not traversed by the road as constructed, the easement traversing the same shall be terminated in the manner hereinafter provided.

Together with such reasonable rights of temporary use of the Grantor's lands immediately adjacent to said right-of-way as may be necessary for the construction, reconstruction, improvement and maintenance of said road.

The acquiring agency is the U.S. Department of Agriculture, Forest Service.

Grantee alone may extend rights and privileges for use of the road to other Government Departments and Agencies, States, and local subdivisions thereof, and to other users including members of the public.

This conveyance is made subject to the following reservations by the Grantor, their heirs and assigns:

1. The right to cross and recross the easement at any point and for any purpose in such manner as will not materially interfere with the use of the road.

CERTIFIED CORRECT AS TO CONSIDERATION,  
DESCRIPTION AND CONDITIONS.  
By Reg. J. J. J. J. Date 7/26/91

2. The right to all timber now or hereafter growing on the easement subject to Grantee's right to cut timber on the easement to the extent necessary for constructing, reconstructing, and maintaining the road. Timber so cut shall, unless otherwise agreed to, be cut into logs of standard lengths and decked along the road for disposal by the Grantor.

It is agreed that the Grantor shall have the right to use the existing road described herein for all purposes deemed necessary or desirable by Grantor in connection with the protection, administration, management and utilization of Grantor's lands or resources now or hereafter owned or controlled, subject, however, to traffic-control regulations as Grantee may reasonably impose under 36 CFR 261.12, and the bearing of road maintenance costs proportionate to use as provided in 36 CFR 212.7(D).

If, at any time, the Regional Forester determines that the road, or any segment thereof is no longer needed, the easement traversed thereby shall terminate. In the event such determination, the Regional Forester shall furnish to the Grantor, its successors, or assigns, a statement in recordable form evidencing termination.

IN WITNESS WHEREOF, the said Grantor has hereunto subscribed their name and affixed their seal on the day and year first above written.
