

Anita Bauer, L.G.

Geothermal Geologist

Anita is very excited to be a member of the Earth Resources Program, where she focuses on providing technical guidance, conducting research, and participating in public outreach related to geothermal resources. Prior to joining the Earth Resources Program, she was part of the geophysics team and Geologic Hazards Program. There she assisted with gravity data collection, data processing, and building iterative subsurface geophysical models for several State Map projects.

Job Responsibilities

Fieldwork, data processing, project management, public outreach, writing, geothermal data assimilation.

Professional Interests

Geophysics, subsurface geology, geologic hazards, climate change, geothermal resources, and energy innovations

Skills

ArcGIS Pro, Oasis montaj, GM-SYS, Microsoft Word and Excel, Adobe Illustrator,

Professional Experience

- Geophysical Assistant, Washington Geological Survey, Olympia, WA
- Teaching Assistant at University of Washington, Seattle, WA
- Associate Geologist, Earth Engineers, Camas, WA

Education

- M.S. Applied Geosciences, University of Washington, Seattle, WA
- B.S. Geosciences, Pacific Lutheran University, Tacoma, WA

Personal Interests

Time with family, woodworking, most outdoor activities, baking, conservation, and travel.
