- The solicitation unnecessarily restricts competition;
- The evaluation/scoring process is unfair or flawed; or
- The requirements are inadequate or insufficient so that a response/bid is difficult to prepare.

Complaints not based on procedural matters will not be considered. Complaints will be rejected as without merit if they address issues such as: 1) an evaluator's professional judgment on the quality of a proposal, or 2) Agency's assessment of its own and/or other agencies needs or requirements.

If no complaint is filed, a Bidder cannot later file a protest based on one of the above complaint criteria.

Any complaint to the solicitation must be in writing and submitted to the Bid Coordinator no less than five (5) business days prior to the date when the bid is due, and shall clearly articulate the basis for the complaint and include a proposed remedy.

Responses to complaints will be articulated in writing, including any resulting changes to the solicitation, and will be posted on WEBS, and the Agency head will be notified.

The Agency's decision is final; no further administrative appeal is available.

- A matter of bias, discrimination or conflict of interest on the part of the evaluator;
- Errors in computing the score;
- Non-compliance with procedures described in the solicitation document, or applicable state or federal laws or regulations.

Upon receipt of a protest, a protest review will be held by the Agency. All available facts will be considered and a decision will be issued by the Commissioner of Public Lands or his/her delegate within five (5) business days of receipt of the protest. If additional time is required, the protesting party will be notified of the delay.

In the event a protest may affect the interest of another Bidder who submitted a bid, such Bidder will be given an opportunity to submit its views and any relevant information on the protest to the Bid Coordinator.

The final determination of the protest shall:

- Find the protest lacking in merit and uphold the Agency's action; or
- Find only technical or harmless errors in the Agency's acquisition process conduct and determine the Agency to be in substantial compliance and reject the protest; or
- Find merit in the protest and provide the Agency options which may include:
 - Correct the errors and re-evaluate all bids, quotations and/or proposals; and/or
 - Reissue the solicitation document; and/or
 - Make other findings and determine other courses of action as appropriate.

If the Agency determines that the protest is without merit, the Agency will enter into a contract with the Apparent Successful Bidder.

The Agency protest decision is final and no appeal process will be required. If a protesting Bidder does not accept the Agency protest response, the Bidder may try to seek relief from Thurston County Superior Court.

P+0 (≤ 10in ³)	1+1 or P+1 or P+1/2 Or 2+0 or 1+0 or P+0 (> 10in ³)	+10%

Table 1: Substitution of Seedling Stock Types

In the event that more than one stock type of Seedlings are required for a planting Unit, the adjustment in Unit Bid Price will be prorated based on the acreage planted with each stock type. In such cases, the entire Unit will use the adjusted price. However, there will be no price adjustments if substitute Stock Type quantities constitute less than 5 percent of the total trees planted on a Unit.

B-08 Weather Conditions

Planting Weather Conditions:

Planting operations will be halted when the Compliance Forester determines weather conditions are injurious to the Seedlings. Weather conditions during which DNR may not allow planting include, but are not limited to:

- E. Opened containers of Seedlings shall be immediately resealed. Contractor shall supply tape and/or stapler to reseal and have them available on the Work site at all times;
- F. Seedlings carried by a worker shall be in a planting bag and arranged for easy removal of one Seedling at a time. Planting bags shall not be overfilled. If available, other Seedlings shall be used until the Compliance Forester has decided whether or not the damaged Seedlings can be planted;
- J. At the end of the Work day, Seedlings which have been distributed but not planted shall be sealed and returned to the cooler; and
- K. Contractor shall keep Seedlings free from damage at all times, including but not limited to: drying, heating, smothering, freezing, drowning, or mechanical injury.

B-10 Spacing and Number of Seedlings

Contractor shall plant Seedlings as follows:

A. Total Seedlings Per Acre

'Total Seedlings per Acre' means the estimated number of Seedlings to be planted per acre, averaged over an entire Unit, or a contiguous area within a Unit. This number varies between Units, and is listed in the Unit Description (Section II-A).

B. Seedlings Per Acre by Species

‘Seedlings per Acre by Species’ means the number of Seedlings of an individual species to be planted per acre, averaged over an entire Unit, or a contiguous area within a Unit. If only one species is to be planted over a Unit, or a contiguous area within a Unit, this number is the same as the Total Seedlings per Acre. If multiple species are to be planted over a Unit, or a contiguous area within a Unit, then the sum of all the Seedlings per Acre by Species will equal the Total Seedlings per Acre.

C. Average Spacing

‘Average Spacing’ means the average distance (in feet) between planted Seedlings in the Unit, that will result in the correct number of Total Seedlings per Acre after planting, when Seedlings are planted in a grid pattern. Average spacing may be different for each unit, or for contiguous areas within a Unit, therefore Seedlings will be planted over the Unit at the Average Spacing listed in the Unit Description (Section II-A).

D. Minimum Spacing

Seedlings shall not be planted closer together than the Minimum Spacing (in feet) specified in the Unit Description (Section II-A), from:

1. Another Contractor-planted Seedling;
2. An acceptable previously planted Seedling; or
3. An acceptable natural Seedling.

Acceptable previously planted or natural seedlings are conifer Seedlings which are at least six (6) inches tall, well formed, and vigorous.

E. Variation to Average Spacing

The spacing of individual Seedlings may vary within the limits of the Minimum Spacing, so long as average spacing is maintained.

B-11 Line Planting Method

Contractor’s planting crew(s) will use the “line” method of planting, unless otherwise permitted by the Compliance Forester. Each worker will only plant one (1) line at a time on each pass. Seedlings planted within each line, and adjacent lines, will both be at the Average Spacing as specified in the Unit Description (Section II-A).

B-12 Satisfactorily Planted Seedlings

Contractor shall plant Seedlings according to all of the following criteria in order for Seedlings to be considered 'Satisfactorily Planted'.

A. Preparation of Planting Spot

A 'Planting Spot' is a spot where a Seedling is planted, that meets all the conditions for Preparation and Clearing as described here:

1. 'Preparation' for planting a Seedling shall include the Clearing of an area with a minimum diameter of one (1) foot that is free of debris that could end up in the planting hole. The Planting Spot shall be located as near to the center of this cleared area as is practicable.
2. 'Clearing' means the removal of duff up to eight (8) inches deep, loosely compacted slash up to two (2) feet deep, and other debris accumulations such as rock, rotten wood, snow, and ice which can be removed by kicking, dragging, or the use of a planting tool.

B. Unplantable Spots

An 'Unplantable Spot' is a spot that does not meet the conditions for Preparation and Clearing, or is closer than the Minimum Spacing specified in the Unit Description (Section II-A). Examples of spots that are considered 'Unplantable' include, but are not limited to, large stumps, boulders, areas of exposed bedrock, sites with large woody brush, and sites with debris accumulations deeper than two (2) feet. Contractor shall not attempt to plant Seedlings in Unplantable Spots.

C. Planting Hole Location and Excavation

The planting hole shall be located and excavated as follows:

1. The planting hole shall be located in mineral soil and as near the center of the Planting Spot as is practicable;
2. Where possible, the planting hole shall be located near stumps, logs, dead brush, or other dead shade to provide protection from animal damage, winds, and solar radiation; and
3. The planting hole shall be vertical, broken out on three sides, and shall be wide and deep enough to fully accommodate the roots of the Seedling being planted.

D. Seedling Placement in Planting Hole

Seedling placement in the planting hole shall be as follows:

1. All Seedlings shall be suspended near the center of the planting hole with the roots in a near natural arrangement;
2. Seedlings shall be at a depth that after filling, packing and leveling, the soil comes to a point midway between the top lateral roots and the lowest needles or branches;
3. The roots shall not be doubled up, twisted, tangled, or bunched;
4. Moist mineral soil shall be filled in and firmly packed around roots. The Seedling should not pull loose after a firm tug on the main stem; and
5. The planted Seedling shall have the main stem and roots vertical and free to grow.

E. Applying the Chemical Spot Treatment to Target Seedlings

1. Chemical spot treatment will be applied to all target seedlings as described in the Unit Description (Section II-A).

2. The Compliance Forester has the authority to classify the chemical application upon individual target seedlings as sufficient or insufficient. Insufficient coverage of chemical to target seedlings, as determined by the Compliance Forester, may disqualify the seedlings from being considered Satisfactorily Planted for the purposes of calculating Planting Performance Rating and associated determinations of final payment (Section I-C).
3. Over application of chemical, as determined by the Compliance Forester, may disqualify the seedlings from being considered Satisfactorily Planted for the purposes of calculating Planting Performance Rating and associated determinations of final payment (Section I-C).

B-13 Seedling Waste by Contractor

Wasted Seedlings are those that have been dumped, dropped, discarded, mishandled, damaged, or otherwise wasted by Contract. Wasted Seedlings shall be considered a breach of contract. See Clause A-23, above.

B-14 Unit Description

The Unit Description details the characteristics and specific Work requirements for each unit. If specific requirements of the Unit Description conflict with the specifications in this section of the contract, the specific requirements of the Unit Description will prevail.

B-15 Department of Natural Resources Obligations

DNR shall be responsible for providing a Compliance Forester to acquaint Contractor with the unit(s) and to conduct periodic field inspections, provided that the Compliance Forester shall not limit Contractor's performance of the Work or limit Contractor's liability for its actions under this Contract.

B-16 Special Requirements

C. Starting Date for Work

Contractor shall begin Work on [04/15/2026], unless alternative plans are approved by the Contract Manager, or the Compliance Forester anticipates Seedling supply issues (Clause B-03) or unfavorable weather conditions (Clause B-05).

E. Interplanting

Some Unit(s) will require interplanting among previously planted Seedlings and/or residual overstory trees. These Unit(s) are noted on the Unit Description (Section II-A). In these Unit(s), Seedlings shall not be planted underneath the tree crown or within the drip line of reserve trees greater than ten (10) inches Diameter at Breast Height (DBH).

SECTION I-C: UNIT COMPLIANCE INSPECTION AND PAYMENT

C-01 Field Inspections

The Compliance Forester will conduct periodic inspections. Inspections may be done concurrently with Work but will be completed no later than five (5) business days after Work completion on the Unit.

C-02 Inspection Plots

The Compliance Forester will install Inspection Plots to assess whether Seedlings have been Satisfactorily Planted (Clause B-09) and meet all Special Planting Requirements (Clause B-11, if applicable), according to the spacing and species requirements listed in the Unit Description (Section II-A). Inspection Plots shall be circular and be between one fiftieth ($1/50^{\text{th}}$, 16.7 foot radius) and one one-hundredth ($1/100^{\text{th}}$, 11.8 foot radius) of an acre in size. There will be a minimum sample of five (5) plots, or two (2) plots for every five (5) acres of Unit, whichever is greater. The Inspection Plots will be well distributed throughout the Unit. The Compliance Forester will record the number of Planting Spots, Seedlings Planted, Satisfactorily Planted Seedlings, Dropped or Wasted Seedlings, and make written comments for each Inspection Plot as described below. In addition to making observations about planted Seedlings, the Compliance Forester may dig up one or more planted Seedlings per Inspection Plot to determine if Seedlings are Satisfactorily Planted.

A. Planting Spots

The number (#) of Planting Spots will be calculated for each Inspection Plot as follows:

$$\# \text{ of Planting Spots} = \# \text{ of Expected Planting Spots} - \# \text{ of Unplantable Spots}$$

1. The number of 'Expected Planting Spots' is calculated for each Inspection Plot by dividing the Total Seedlings per Acre (from the Unit Description, Section II-A) by the inverse of the plot size being used for compliance (e.g. divide by 50 if using $1/50^{\text{th}}$ acres plots) and rounding to the nearest whole number.
2. The number of Unplantable Spots (Clause B-09-B) is calculated for each Inspection Plot by visually estimating the percentage of the area of the Plot that is Unplantable, multiplying it by the number of Expected Planting Spots, and rounding to the nearest whole number.

Example: Total Seedlings per Acre = 500 and 20% of the Inspection Plot is Unplantable.

The number of Expected Planting Spots is:	$500 / 50 =$	10
The number of Unplantable Spots is:	$20\% \times 10 =$	2
The number of Planting Spots is:	$10 - 2 =$	8

B. Seedlings Planted

'Seedlings Planted' is the number of Contractor-planted Seedlings within the Inspection Plot, including both Seedlings that are Satisfactorily Planted and those that are not. Although this number is not used in the Seedling Planting Performance Rating (Clause C-03), it may be used by the Compliance Forester to demonstrate examples of Unsatisfactorily Planted Seedlings to the Contractor, when the number of Seedlings Planted is greater than the number of Satisfactorily Planted Seedlings.

C. Satisfactorily Planted Seedlings

The number of Satisfactorily Planted Seedlings is the number of Contractor-planted Seedlings within the Inspection Plot that meet all applicable specifications of Clause B-09, Clause B-11, and the Unit Description (Section II-A). This number will be less than or equal to the number of Seedlings Planted because Seedlings that are not Satisfactorily Planted will be deducted. Examples of Seedlings that will not be counted include, but are not limited to, those that have been planted: closer than the Minimum Spacing (Clause B-07-D); without proper Preparation and Clearing of the Planting Spot (Clause B-09-A); or in Unplantable Spots (Clause B-09-B). In addition, planted Seedlings will not be counted if the planting hole has been improperly located or excavated (Clause B-09-C), or if the seedling placement in the hole is inadequate because the roots

are damaged or bent, the Seedling is buried too deep, or the soil is not packed firmly around the roots (Clause B-09-D).

D. Wasted Seedlings

The Compliance Forester will record the combined number of Wasted Seedlings (as defined in Clause B-10) found on the Unit. Such Seedlings can be on individual Inspection Plots, elsewhere in the Unit, or where Seedlings are unloaded prior to planting. Wasted Seedlings include those that are damaged by the Contractor to the extent that they cannot be planted or replanted, due to Contractor’s failure to meet the requirements for transportation and handling (Clause B-06), Satisfactorily Planted Seedlings (Clause B-09), or other Special Planting Requirements (Clause B-11, if applicable).

C-03 Seedling Planting Performance Rating

The Compliance Forester will calculate the ‘Seedling Planting Performance Rating’ for each Unit. The Seedling Planting Performance Rating will be expressed as a percent and will be calculated using the sum (or aggregate) of all Inspection Plots in a Unit. The total of all recorded values for Satisfactorily Planted Seedlings (Clause C-02-C), divided by the total of all recorded values for Planting Spots (Clause C-02-A), multiplied by one hundred (100), equals the Seedling Planting Performance Rating percent:

$$\frac{\text{Total Satisfactorily Planted Seedlings}}{\text{Total Planting Spots}} \times 100 = \text{Seedling Planting Performance Rating \%}$$

C-04 Determination of Payment by Unit

The acceptability and the Rate of Pay for planting Work performed will be based on the Seedling Planting Performance Rating (Clause C-03) for each Unit.

A. Satisfactory Planting Performance

‘Satisfactory Planting Performance’ on the Unit is when the Seedling Planting Performance Rating is between 92 percent and 105 percent.

B. Unsatisfactory Planting Performance

‘Unsatisfactory Planting Performance’ on the Unit is when the Seedling Planting Performance Rating is greater than 105 percent or less than 92 percent, or the Unit is not planted to boundaries.

C. Rate of Pay

The ‘Rate of Pay’ is the actual amount (in dollars) that the Contractor will be paid per thousand Seedlings for each Unit. The Rate of Pay is equal to the Unit Bid Price for Units with Satisfactory Planting Performance. The Rate of Pay is the Unit Bid Price minus any reductions in payment (Clause C-04-D) for Units with Unsatisfactory Planting Performance. The Rate of Pay will not exceed the Unit Bid Price for any Unit.

D. Reduction in Payment

The reduction in payment for Unsatisfactory Planting Performance on a Unit will be calculated for the Unit as follows:

1. If the Seedling Planting Performance Rating is less than 92 percent but equal to or greater than 80 percent, the Rate of Pay will be equal to the Unit Bid Price reduced by 3 percent for every 1 percent the Seedling Planting Performance Rating is less than 92 percent.
2. If the Seedling Planting Performance Rating is less than 80 percent, or if the Unit is not planted to boundaries, there will be no payment.
3. If the Seedling Planting Performance Rating is greater than 105 percent, the Rate of Pay will be equal to the Unit Bid Price reduced by 3 percent for every 1 percent the Seedling Planting Performance Rating is above 105 percent.

4. The Contract Manager will deduct from Contractor's payment three dollars (\$3) per Seedling found Wasted by Contractor (Clause C-02-D).

C-05 Payment Examples

Example A: The Unit Bid Price is \$66 per thousand and the Seedling Planting Performance Rating is 80 percent.

The Seedling Planting Performance Rating of 80 percent is 12 percentage points less than the 92 percent minimum performance threshold. A 3 percent reduction for each of the percentage points below that threshold equals a total reduction in the Unit Bid Price of 36 percent. Therefore, 100 percent minus 36 percent equals 64 percent. The Rate of Pay for the Unit is calculated by multiplying 64 percent by \$66/thousand = \$42.24/thousand.

Example B: The Unit Bid Price is \$78 per thousand and the Seedling Planting Performance Rating is 107 percent.

The Seedling Planting Performance Rating of 107 percent is 2 percentage points greater than the 105 percent maximum performance threshold. A 3 percent reduction for each of the percentage points above that threshold equals a total reduction in the Unit Bid Price of 6 percent. Therefore, 100 percent minus 6 percent equals 94 percent. The Rate of Pay for the Unit is calculated by multiplying 94 percent X \$78/thousand = \$73.32/thousand.

C-06 Re-work of Unsatisfactory Units

The Compliance Forester may require Contractor to re-work a Unit that has an Unsatisfactory Seedling Planting Performance Rating (Clause C-03). The Compliance Forester may require the re-work to be completed prior to starting Work on a new Unit. The Compliance Forester will take new Inspection Plots and calculate a new Seedling Planting Performance Rating for re-worked Units, which will replace the previous Seedling Planting Performance Rating.

If Contractor refuses to re-work the Unit, DNR may then pursue its available remedies for either breach (Clause A-23) or default (Clause A-24) of contract. If Contractor re-works the Unit and it is rated unsatisfactory a second time, DNR may consider this breach or default of contract.

The Compliance Forester is not required to give Contractor the opportunity to re-work Unit(s) with Unsatisfactory Seedling Planting Performance Ratings (Clause C-03). In some cases, DNR may not have the additional staff needed to perform contract compliance for such re-work, and Contractor's overall performance on this contract may indicate that Contractor will be unable to improve the quality of Work enough to justify the additional time and expense of re-working Unit(s). In these cases, the Compliance Forester may choose to simply calculate the correct reduction in payment in accordance with Clause C-04-D and allow Contractor to continue Work on other Unit(s).

C-07 Payments

DNR will issue payments after field inspections have been completed. Payments will be made using the following criteria to determine rates and schedules:

A. Payment Schedule

The DNR shall make payments, in such amounts as DNR determines are properly due in accordance with the Work Schedule. Payments may be made by the month, unit, or by one total payment. Details of payment schedule will be determined in the Pre-Work Conference (Clause A-19) and will be set forth in the Work Schedule which shall become a part of this Contract once approved by DNR. DNR will attempt to comply with the desires and needs of Contractor but assumes no legal duty or obligation to adhere to the schedule of payment so arranged.

B. Partial Payment

Partial Payment may be made upon completion of part of a unit as determined by DNR. Request for partial payment is to be made by Contractor utilizing Contractor's Billing Invoice and Compliance Report provided by DNR. Contractor or Designated Contract Representative shall sign Contractor's Billing Invoice and Compliance Report after completion of each such "sub-unit" being submitted for payment. DNR will then make payment recommendations for the invoice and forward Contractor's Billing Invoice and Compliance Report to DNR's Region office for processing.

C. Unit Completion Form

Contractor or Designated Contract Representative shall sign the Unit completion form after completion of each partial Unit being submitted for payment, or at the conclusion of Work and completion of the Compliance Inspection for each Unit. The Compliance Forester will make payment recommendations for the invoice and forward the Unit completion form to the Contract Manager for processing.

D. Verification Traverse

If a Unit's acreage is disputed, Contractor may request a verification traverse by DNR. The request must be in writing and signed by Contractor. DNR will base the rate of pay on the acres determined from the verification traverse. If the net acres specified in the Unit Description (Section II-A) are correct within plus or minus five percent ($\pm 5\%$) after the verification traverse, Contractor shall pay for the verification traverse at a rate of ten dollars (\$10.00) per one hundred (100) feet of traversed boundary.

E. Reduction in Payment

DNR may withhold or, on account of subsequently discovered evidence, nullify the whole or part of any payment to such extent as may be necessary to protect DNR from loss or damage for reasons including but not limited to:

1. Work not in accordance with the Contract Documents;
2. Reasonable evidence that the Work required by the Contract Documents cannot be completed for the unpaid balance of the Contract Sum;
3. Work by DNR to correct defective Work or complete the Work;
4. Failure to perform in accordance with the Contract Documents; or
5. Cost or liability that may occur to DNR as the result of Contractor's fault or negligent acts or omissions.
6. Upon completion of individual units, if the Compliance Forester calculates the application rate (active ingredients, adjuvants, and carriers), and determines that Contractor has applied less than the specified quantity (i.e., gallons of solution/acre) in the Contract, then DNR at its discretion can reduce payment by the percentage less than the specified quantity. In general, this will only occur when the quantity applied is less than 90% of the specified quantity. In such cases, it is not in the DNR's interest to require the Contractor to re-enter the unit and apply the remaining herbicide, therefore DNR may reduce payment as follows:

Unit acres x gallons of solution/acre = total gallons of solution/unit

Total gallons of solution applied / total gallons of solution specified x 100 = % of specified

% below specified x total unit price (\$) = total unit payment (\$)

EXAMPLE:

A 50 acre unit is specified to be sprayed with 10 gallons of solution per acre. Upon completion of spraying, the Compliance Forester determines that 420 gallons have been applied. The bid price per acre

was \$75.00 and the total unit bid price was \$3,750.00.

50 acres x 10 gallons = 500 gallons of solution specified

420 gallons of solution applied / 500 gallons of solution specified x 100 = 84% of specified

84% x \$3,750.00 = \$3,150.00 payment for unit (reduction in payment of \$620.00)
