

SEPA¹ Environmental Checklist

I have reviewed this SEPA Checklist. My comments are shown in blue.

2619022

Krista Pagel
Forest Practices Coordinator
Olympic Region DNR

KP

2/27/2026

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use “not applicable” or “does not apply” only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

A. Background

[Find help answering background questions²](#)

1. **Name of proposed project, if applicable:** 30N12W228

2. **Name of applicant:** Tye Forests Seed Asset 1 LLC

3. **Address and phone number of applicant and contact person:**
 C/O Campbell Global LLC
 P.O. Box 1290 Port Angeles, WA 98362
 (360)461-8834 Kenneth Hurn
4. **Date checklist prepared:** 1/21/2026

5. **Agency requesting checklist:** Department of Natural Resources (DNR)

6. **Proposed timing of schedule (including phasing, if applicable):** 2026-2029

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**
 Yes, upon completion of timber harvest, the site will be reforested.
8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**
 Geotechnical Report prepared by E. Steve Toth, a Licensed Engineering Geologist, on file at DNR Olympic Region Office or available online with the FPARS internet application review system. [Geo report and CMZ form are available on FPARS with FPA 2619022.](#)
9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**
 No.
10. **List any government approvals or permits that will be needed for your proposal, if known.**
 An approved Forest Practice Application/Notification (FPA/N) from WA DNR.

[FPA 2619022.](#)

² <https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background>

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

This proposal is even-age harvest of 64.1 acres of timber. The site is located approximately 10 miles northeast of Forks, Washington. Timber harvest will occur on the groundwater recharge area of a glacial deep-seated landslide and cable yarding will occur over inner gorge features. These features are described in the geotechnical report along with analysis and recommendations for protection of the unstable features.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

On parts of: Sections 19, 29, and 30, Township 30 North, Range 12 West, W.M. all in Clallam County, Washington. Location matches FPA 2619022 Q7.

B.Environmental Elements

1. Earth

[Find help answering earth questions³](#)

- a. General description of the site:

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

- b. What is the steepest slope on the site (approximate percent slope)?

70%

Steepest slope matches
FPA 2619022 Q19.

- c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

"The northern half of the harvest unit is underlain by Tertiary marine sedimentary rocks of the Ozette Lake-Calawah Ridge block [OEm(o)], while the southern half of the unit is mapped as continental glacial till (Qgt) and outwash (Qgo) (Figure 4). The Ozette Lake-

³ <https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth>

Calawah Ridge block has medium- to very thick-bedded, light- to olive-gray, micaceous, quartzose, feldspathic sandstone, with interbeds of thin-bedded, fine-grained turbidite sandstone and siltstone; thin coal seams; thin laminae to thick interbeds of siltstone; siltstone-chip conglomerate; pebble conglomerate; and mudstone debris flows (Schasse 2003). Tectonic zone deposits (tz) are also mapped just to the north of the harvest unit. Most of the bedrock in the project area has been sheared and folded to some extent due to its proximity to the Calawah and Crescent fault zones. The tectonic zone along the Calawah fault is an area of penetrative shearing that may include large tectonic blocks.

The soils in the northern two-thirds of the 30N12W228 harvest unit are mapped as Klahowya silt loam on slopes of 5 to 35 percent gradient (78), while the southern third consists of Klone-Klahowya-Tealwhit complex on 0 to 15 percent gradient slopes (80) (Figure 5). The Klahowya soil type formed in glacial till parent material and consists of gravelly silt and sandy loam. The moderately well drained Klahowya soil typically has a depth of 40 to 60 inches to a dense substratum of till. The Klone-Klahowya-Tealwhit complex typically includes about 50 percent Klone soil type and 25 percent each of the Klahowya and Tealwhit soil types. The well-drained Klone soil type formed in glacial outwash, while the poorly-drained Tealwhit soil type developed in alluvium. Both soil types have a depth of greater than 80 inches. The Klahowya soil type is considered a severe erosion hazard for unsurfaced roads and trails, while the Klone-Klahowya-Tealwhit complex is rated a moderate erosion hazard (NRCS 2025)."

(E. Steven Toth, Geotechnical Assessment of the 30N12W228 Harvest Unit.)

- d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

Geo report is available on FPARS with FPA 2619022.

Historic slope movement such as, landslides, slumping, and surface erosion have been reviewed by a licensed engineering geologist and assessed for slope stability concerns. Potential slope movement associated with future harvest/road activities has also been reviewed and addressed by the geotechnical report. See geotechnical report for more information.

- e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.**

None.

- f. Could erosion occur because of clearing, construction, or use? If so, generally describe.**

"The inner gorge along Creek 3 in 30N12W228 harvest units is a naturally unstable area that has a high likelihood of delivering sediment and debris into surface waters. Timber harvest has a low likelihood of increasing sediment delivery in this naturally unstable terrain due to the retention of trees within the buffer. The felling of trees for the yarding corridor may locally increase the rate of erosion and sloughing of colluvium, but the

relatively short length of the planar slopes and the remaining rooting strength from the surrounding forest stand suggests a low likelihood for increasing sediment delivery beyond natural background rates. Any trees felled for the yarding corridor will be retained on the slope to provide potential erosion control. Little threat to public safety exists due to the remote setting in commercial timberlands with gated roads. "

(E. Steven Toth, Geotechnical Assessment of the 30N12W228 Harvest Unit.)

- g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

None.

- h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any.**

Existing roads will be stabilized by improving ditches and replacing culverts.

The proponent agrees to follow all recommendations of the geotechnical report including proposed mitigation measures, which consist of:

"The primary mitigation measure proposed for the yarding corridor is to fell trees sideways across the slope and to leave them in place to help minimize erosion and potentially stabilize the surrounding soil mass. The yarding corridor is necessary as an alternative to road construction on steep terrain, which has a far greater potential for environmental impacts from slope movement. Sufficient suspension should be achieved during yarding operations to minimize soil disturbance, and slash should be used to cover any exposed or rutted areas."

(E. Steven Toth, Geotechnical Assessment of the 30N12W228 Harvest Unit.)

2. Air

[Find help answering air questions⁴](#)

- a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.**

Insignificant amounts of engine exhaust from logging equipment and dust from the passage of log trucks.

- b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.**

⁴ <https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-Air>

None known.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None.

3. Water

[Find help answering water questions⁵](#)

a. Surface:

[Find help answering surface water questions⁶](#)

- 1. Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.**

Beaver Creek, a tributary of the Sol Duc River, is on the site, along with several unnamed Type F and Ns streams that flow into Beaver Creek.

- 2. Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.**

Yes. Hanging of cable lines will occur over all stream types. Cable logging will occur over Type Ns streams. Equipment crossings and timber falling may occur in the Type Ns streams.

- 3. Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.**

None.

- 4. Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.**

No.

- 5. Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.**

No.

- 6. Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.**

No.

Proposed, "in or over" matches FPA 2619022 Q14. Timber Harvest is proposed within 200 ft of streams per FPA Q25.

⁵ <https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water>

⁶ <https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water>

b. Ground:

[Find help answering ground water questions⁷](#)

- 1. Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**

No.

- 2. Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals...; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

None.

c. Water Runoff (including stormwater):

- 1. Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

Water intercepted by road ditches will be diverted through cross drains to the forest floor.

- 2. Could waste materials enter ground or surface waters? If so, generally describe.**

Yes, on rainy days sediment could enter streams.

- 3. Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.**

No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

Riparian buffers have been placed on Type F streams. Most Type Ns streams have an adjacent slope stability buffer. Logging near Type Ns streams is also subject to a 30-foot equipment limitation zone requirement. The proponent will follow recommendations listed in the geotechnical report.

⁷ <https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Groundwater>

4. Plants

[Find help answering plants questions](#)

a. Check the types of vegetation found on the site:

- deciduous tree: alder, maple, aspen, other
- evergreen tree: fir, cedar, pine, other – hemlock, spruce
- shrubs
- grass
- pasture
- crop or grain
- orchards, vineyards, or other permanent crops.
- wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
- water plants: water lily, eelgrass, milfoil, other
- other types of vegetation

Per FPA 2619022, 1,282 MBF of timber and approximately 641 tons of biomass will be removed.

b. What kind and amount of vegetation will be removed or altered?

64.1 acres of second-growth timber with an estimated 1,693 mbf and approximately 846 tons of biomass are to be harvested.

c. List threatened and endangered species known to be on or near the site.

None known. No T&E plant species found during FPRAM review.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.

None.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals

Find help answering animal questions⁸

- a. List any birds and other animals that have been observed on or near the site or are known to be on or near the site.

Examples include:

- Birds: hawk, heron, eagle, songbirds, other:
- Mammals: deer, bear, elk, beaver, other:
- Fish: bass, salmon, trout, herring, shellfish, other:

Per FPRAM review, proposal is within an NSO SOSEA, inside a median home range circle, and in habitat. Proposal is also within a MM detection area and within the 1.5 mile buffer of an occupied site.

- b. List any threatened and endangered species known to be on or near the site.

None known.

- c. Is the site part of a migration route? If so, explain.

All of Washington State is considered part of the Pacific Flyway. However, no impacts to migration routes are anticipated as a result of this proposal.

- d. Proposed measures to preserve or enhance wildlife, if any.

RMZs and slope stability buffers will retain trees on the site for the benefit of fish and wildlife.

- e. List any invasive animal species known to be on or near the site.

None known.

6. Energy and natural resources

Find help answering energy and natural resource questions⁹

- a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

N/A

- b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No.

- c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.

None.

⁸ <https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals>

⁹ <https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou>

7. Environmental health

[Health Find help with answering environmental health questions¹⁰](https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health)

- a. **Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.**

Petroleum products for the equipment and if a spill is detected WA-ECY will be contacted.

1. **Describe any known or possible contamination at the site from present or past uses.**

None known.

2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**

None known.

3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.**

None known.

4. **Describe special emergency services that might be required.**

Incidental EMS services may be required for the duration of the project.

5. **Proposed measures to reduce or control environmental health hazards, if any.**

None.

b. **Noise**

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?**

None.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**

Logging – less than 85 dba – daylight hours only.

3. **Proposed measures to reduce or control noise impacts, if any:**

None.

¹⁰ <https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health>

8. Land and shoreline use

[Find help answering land and shoreline use questions](#)¹¹

- a. **What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.**

Commercial forestland.

- b. **Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?**

Yes, working forest lands. None. None.

1. **Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?**

No.

- c. **Describe any structures on the site.**

None.

- d. **Will any structures be demolished? If so, what?**

No.

- e. **What is the current zoning classification of the site?**

Commercial forestland.

- f. **What is the current comprehensive plan designation of the site?**

Commercial forestland.

- g. **If applicable, what is the current shoreline master program designation of the site?**

N/A

- h. **Has any part of the site been classified as a critical area by the city or county? If so, specify.**

No.

- i. **Approximately how many people would reside or work in the completed project?**

Zero.

- j. **Approximately how many people would the completed project displace?**

Zero.

¹¹ <https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use>

- k. **Proposed measures to avoid or reduce displacement impacts, if any.**

N/A

- l. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.**

None. This proposal is consistent with existing land use.

- m. **Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:**

None. This proposal is consistent with existing land use.

9. Housing

[Find help answering housing questions](#)¹²

- a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

None.

- b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

None.

- c. **Proposed measures to reduce or control housing impacts, if any:**

N/A

10. Aesthetics

[Find help answering aesthetics questions](#)¹³

- a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**

N/A

- b. **What views in the immediate vicinity would be altered or obstructed?**

None.

- c. **Proposed measures to reduce or control aesthetic impacts, if any:**

Harvest area will be reforested per WA forest practices.

¹² <https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-9-Housing>

¹³ <https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-10-Aesthetics>

11. Light and glare

[Find help answering light and glare questions](#)¹⁴

- a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?**

None.

- b. **Could light or glare from the finished project be a safety hazard or interfere with views?**

No.

- c. **What existing off-site sources of light or glare may affect your proposal?**

None.

- d. **Proposed measures to reduce or control light and glare impacts, if any:**

None.

12. Recreation

[Find help answering recreation questions](#)

- a. **What designated and informal recreational opportunities are in the immediate vicinity?**

Hunting, berry picking.

- b. **Would the proposed project displace any existing recreational uses? If so, describe.**

The proposal will enhance deer and elk hunting opportunities for the foreseeable future.

- c. **Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:**

None.

13. Historic and cultural preservation

[Find help answering historic and cultural preservation questions](#)¹⁵

- a. **Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.**

No.

No historical sites or resources found during FPRAM review.

¹⁴ <https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-11-Light-glare>

¹⁵ <https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-13-Historic-cultural-p>

- b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

No.- In reference to the DAHP register.

No cultural sites or resources found during FPAM review.

- c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

Local knowledge of the area.

- d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

In the event unknown resources are discovered activities will halt, DAHP as well as the affected tribe will be contacted.

14. Transportation

[Find help with answering transportation questions](#)¹⁶

- a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

The proposal can be accessed by Highway 113 and private logging roads.

- b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

No.

- c. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

Yes, approximately 2,865 feet of existing forest road will be improved.

- d. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

¹⁶ <https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-14-Transportation>

- e. **How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?**

None.

- f. **Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.**

No.

- g. **Proposed measures to reduce or control transportation impacts, if any:**

None.

15. Public services

[Find help answering public service questions¹⁷](#)

- a. **Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.**

No.

- b. **Proposed measures to reduce or control direct impacts on public services, if any.**

None.

16. Utilities

[Find help answering utilities questions¹⁸](#)

- a. **Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:**

None.

- b. **Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.**

None.
