Summary of Comments and Responses (if applicable):
A comment from the Jamestown S'Klallam Tribal Historic Preservation Office was received. JST THPO concurs with the DNRs proposed measures to avoid impacts to cultural resources. A response was not sent.

Olympic Region Clean Air Agency provided an informational comment with a link to ORCAA general standards and regulations. A response was not sent.

A comment from Julianne and Adam Targan was received regarding concerns of spraying glyphosate in Unit 5 after harvest and the necessity of replanting the unit. Per WAC 222-34-010, unless the harvest application indicates the land will be converted to another use, reforestation is required for forest lands if the unit is clear cut or more than 50 percent of the timber volume is removed within a 5-year period. Additionally, competing vegetation shall be controlled to allow establishment, survival and growth by commercial species. This comment has been taken into consideration and does not change the threshold determination. A response will be sent by the landowner.

A comment was received from the Legacy Forest Defense Coalition requesting that the landowner work with the DNR's Natural Heritage Program to screen units 1, 3, and 5 for potential elemental occurrences of rare plant communities. This comment has been taken into consideration and does not change the threshold determination. A response will be sent by the landowner.
